

# Exot.se växtlista 2020

*Livet är för kort för tråkiga växter!*

Ludvig Johansson, trädälskare

Vår idé är att erbjuda Europas största utbud av roliga och härdiga växter till mycket låga priser. Vi är återförsäljare till flera av Europas ledande plantskolor.

De låga priserna kan vi hålla genom att ta in beställningar, sedan ta hem plantorna och därefter kan ni hämta dem hos oss i Häggum (söder om Skövde). Inga mellanhänder. Som en vanlig plantskola fast fler och ovanligare växter till lägre priser. **Ganska enkelt! Det enda svåra är att bestämma vilka rariteter ni vill ha!**

**NYTT:** För beställningar över 5000kr inom Svealand och Götaland kan vi ordna frakt. Vi jobbar på att fixa även Norrland.

**Fast avgift 2000kr inkl. första pallen, efterföljande pall 2000kr/st. En pall rymmer 20-60 träd. Större träd (>3m hög, kruka C60 eller större) måste hämtas på plats. Föreningar, vänner mm, överväg samköp. Växterna levereras till en plats per beställning.**

Vi fokuserar på buskar och träd, men kan även erbjuda perenner, bärbuskar, fruktträd, medelhavsväxter och halvhärdiga exoter. Förutom beställningssortimentet kommer vi försöka ha ett antal växter hemma för impulsköp.

**Tipsa dina vänner om växtlistan. Det gör att vi kan fortsätta hålla ett lågt pris.**

**Leverans och betalning:**

Vi hör av oss när ni kan hämta växterna. Det är vår ambition att ni ska kunna göra det senast i **maj 2020** beroende på väderlek. Växterna betalas i samband med att ni hämtar dem (vi tar kort, kontant, swish). Plantskolan ligger bredvid kyrkan i byn Häggum, ca 1,5 mil söder om Skövde (mellan Skultorp och Stenstorp).

OBS! Vi förbehåller oss rätten att neka en beställning. Dessutom kan det hända att växter tar slut. Då gäller först till kvarn.

### Förklaring till växtlistan:

|         |  |
|---------|--|
| Nr      | Artikelnummer  |
| Växt    | Växtens vetenskapliga namn och beskrivning   |
| Kruka   | Alla växter är krukodlade förutom de som anges med rotklump. Krukan är ett sätt att mäta storlek på växten.<br><br>C2 = Container rundkruka 2 liter, P7 = Fyrkantig kruka med sida 7cm   |
| Höjd    | Växtens ungefärliga höjd i cm. Vår erfarenhet är att de flesta växterna som levereras är markant högre. Omkr. betyder omkrets i cm   |
| Omkrets | Anger stammens omkrets i cm t.ex. 10-12 cm omkrets innebär att stammen är ca 3,5-4cm grov (dela med pi 3,14). Jämför med växter i naturen och din trädgård för att få en uppfattning hur stort ett träd med viss stamgrovlek är. |
| Form    | PA = Standard trädform, rotklump = jordklump, specialform t.ex. klot anges   |
| Pris    | Ditt pris vid avhämtning med reservation för (större) valutaändringar. Priset är i svenska kronor (SEK).   |

**Moms ingår i priset.**

**OBS! Listan är lång! Överväg att inte skriva ut den.**

Vi tar gärna emot förslag på växter ni skulle vilja beställa i framtiden som inte finns på årets lista.

För **Rhododendron** och **Magnolia** kan vi även ordna många andra sorter. Hör av er.
