## AGEING, SEXING AND PLUMAGE OF THE AUSTRALIAN KOEL *Eudynamys cyanocephala*

H. J. De S. DISNEY

Research Associate, Australian Museum, Box A285, Sydney South, NSW 2000

*Received 20 September 1991*

Detailed descriptions of the juvenile, immature and adult plumages are given based on information from captive birds and museum specimens. Young birds can be sexed by the wing coverts over the patagium, which are black in males and black with buff or white tips in females.
