2019-2020 INTRODUCTION

Welcome to this year's catalog. We hope all of you are excited to see the new material and many of our old favorites. We, as always, have added a number of sensational plants that are new to us and to the industry. It is amazing every year, there are so many new plants developed for the consumer. Roger is constantly on the hunt for these new species and cultivars and is always experimenting in our garden. Some don't make the cut and are bound for the compost pile while others prove to be worth adding to the collection of spectacular plants we have always tried to offer. Don't forget the older varieties we offer. The ones we choose to carry year after year are in the catalog for an important reason. They are the proven species for us and have survived the test of time in our garden.

We will jump into the annual what are we up to part of the catalog. For those of you new to this we give an update each year because many of you we have known for 20-30 years or even more. I am not going to lie this has been a difficult year for us! Marj is doing well and will turn 91 this week. Roger is leading a tour group through the Carolina's the first part of October. He is excited to share this area with people and show the gardens he has enjoyed seeing for decades. Pierce has been guiding full time on the American River in California since May. He is running class 4 whitewater every day showing people something they could never do on their own. He will be home for a week and then he will head back to California for school. He is doing an EMT training program and will finish with his EMT certification and his wilderness first responder certification. Dawn has just started back for her 30th year of teaching this past week. She and her horse Cooper did very well at the Regional horse show in Nampa Idaho. She has many ribbons and trophies to show for her efforts. Now for the rough part of the year: I thought I had hurt my back in March. I was seeing the doctor and was not getting better over a couple weeks. Then over the course of two days I started losing all feeling from the chest down and ended up in the ER unable to walk and numb from the chest down. Leaving out many of the gory details of many possible diagnoses, I was diagnosed with shingles induced transverse myelitis. Shingles had attacked my spinal cord and was causing swelling and damage to the nerves. I was in the hospital for a week and a half and have been working on recovery ever since. I have been told a year to a year and a half to recover, and probably will have some permanent damage. This has been hard for me and all those involved. I would like to thank Roger for stepping up at the nursery and doing a lot more work. Pierce stepped in and handled all the shipping for the nursery this spring, helping save the shipping season. I also had many friends step up and help at various points to assist in keeping the show running, Chuck

Davis, Jim Donovan, Wayne Headlee, Scott Weaver and many others all helped to cover the load. I am doing everything I can to get back to where I was before this happened. PT several hours a week and lots of pool time and it has all helped. I am back to probably 85% of where I was before it all started, I am still seeing slow progress each week. So I feel my civic duty is to tell everyone out there to get your shingles shot, this is one of the many horrible things that can happen with this virus. I would like to give special thanks to Dawn, this was a horrible for her as well. She helped me push through and has supported me every step of the way.

Now, back to the good news of the nursery business. We have been involved with selling our material through another website the last couple years: Plantlust.com. This has helped our sales and increased our exposure to new customers we may have never reached on our own. It is difficult for a small nursery in Springfield, Oregon to get national exposure. This site has allowed us to reach hundreds of new people and we would like to thank Megan, Grace and Patricia for helping us expand our audience.

As always, if you are in the area, come see us. We are always acquiring new plants not yet in the catalog! The garden is always available to walk through and see what we have added to the collection. If you are planning on traveling to see us, please call to make sure we will be available to assist you.

We would like to thank: Wayne Headee the best employee and neighbor anyone could ever hope to have, Lisa Sebright for her help in the office, and Diana Learner for her help editing the catalog.

I would like to add a small word on our shipping prices. We have always tried to simply break even on our shipping cost. This has become more and more difficult the past several years, as anyone who has shipped a larger package would know. Our plants are generally bigger than the plants you will receive from many other nurseries, and because of this our shipping prices have to reflect that fact.

We hope you enjoy the catalog! We look forward to hearing from you all and hopefully seeing some of you this year. Have a great year, best wishes to all of you.

GOSSLER FARMS NURSERY

Open **WEDNESDAY THROUGH SATURDAY** Year Round or by appointment 9:00 to 4:00

IF COMING A DISTANCE, CALL FOR AN APPOINTMENT DURING THE YEAR TO BE SURE SOMEONE IS AVAILABLE TO ASSIST.

FALL 2019 and SPRING 2020

 **Indicates new plants added this year.**

ABIES

 **A. ALBA 'HEDGE'**- is a very slow growing conifer that is wider than tall. The lighter green new needles turn a deep green. 1 gal. \$ 60.00

A. 'ALPINE STAR'- Comes from Scotland and is deepest green. This healthy small conical plant will make a beautiful specimen plant year round. 2 gal. \$ 80.00

A. BALSAMEA 'NANA'- Even though the dwarf balsam fir has been around for decades; it's still a superb conifer. This low growing plant has deep green needles. Older plants will thin out and the large limbs will create an excellent bonsai. 1 gal. \$ 40.00

A. BALSAMEA 'PICCOLO'- This low grower is more horizontal growing than vertical. Was found in Germany. This plant has deep green curled needles. Seems to be much smaller than A. balsamea 'Nana'. Welsh pot \$ 40.00

 **A. BORISII-REGIS 'GREECE'**- is a miniature bun with somewhat weeping stems. The needles are bluish green. Found by Jorg Kohout, Germany. A very pretty little plant. 1 gal. \$ 60.00

 **A. CONCOLOR 'BLUE CLOAK'**- is a moderate grower (10') with a full-layered form. The blue needles are really attractive year round. Said to be semi pendular, but we have only seen plants that had horizontal branches. 1 gal. \$ 52.00

 **A. CONCOLOR 'KING'S GAP'**- is a pyramidal fir with attractive blue needles. Very slow growing and beautiful year round. 1 gal. \$ 58.00

 **A. KOREANA 'AUREA'**- is a low grower that will eventually form a leader. This golden yellow foliated fir will be attractive year round. 1 gal. \$ 50.00

 **A. KOREANA 'CIS'**- is a flat topped deep green Korean fir. Should get 18"x24" in many years. 1 gal. \$ 58.00

A. KOREANA 'ICE BREAKER'- This glorious dwarf conifer has curled needles similar to A. koreana 'Silberlocke'. The plant has its needles turn totally around the stems creating a white and green effect. The one-gallon plants are lovely. The 2-gallon plants are unbelievably beautiful. 1 gal. \$ 50.00

2 gal. \$ 85.00

 **A. KOREANA 'OBERON'**- Came to us from Stolwijk Nursery, Netherlands. This deep green foliated plant has short needles. Slowly makes a leader, but will always be very small. 1 gal. \$ 50.00

 **A. KOREANA 'SILBERZWERG'**- is a very slow grower. Our plant is 30 years old (+-) in a container and is 14"-16" tall. This is a glorious container plant for a lifetime. Short mid green needles are attractive year round. Welsh pot \$ 50.00

 **A. KOREANA 'TUNDRA'**- Can eventually form a leader in many years. This very small Korean fir has deep green needles. The original was found as witches broom in Germany. 3 gal. \$ 90.00

 **A. LASIOCARPA 'GLACIER'** (Logan Pass)- is a really small blue-green needled alpine fir from the Rockies. The tiny needles are very attractive year round. 1 gal. \$ 48.00

 **A. LASIOCARPA 'GLAUCA COMPACTA'**- is a beautiful conical alpine fir. The blue needles make a superb specimen plant. 1 gal. \$ 48.00

A. NORDMANIANA 'GOLDEN SPREADER'- I always see this plant in gardens and want to add it to our garden. (We already have a plant in a container). So, it's always a challenge not to buy more plants. This prostrate grower gets 18"x36" and is glowing golden yellow; especially in the winter. 1 gal. \$ 45.00

 **A. NORDMANIANA 'JAKOBSEN'**- is a tiny compact fir that has lighter green new growth followed by deeper green needles. This really cute plant will make a handsome container plant. 1 gal. \$ 50.00

ACER

A. CAMPESTRE 'CARNIVAL'- The English hedge maple makes a small shrubby tree with deep green leaves. A. campestre 'Carnival' is a small version (8-10') over a long time. The foliage is white with a light green center. 1 gal. \$ 50.00

A. CIRCINATUM 'BURGUNDY JEWEL' - Our native vine maple is a large shrub or small tree with dark green leaves. In fall the foliage will turn brilliant red-yellow. A. c. 'Burgundy Jewel' has deep purple growth most of the summer. The plant seems more stout and upright than the species. A nice color accent for the shade garden. 1 gal. \$ 50.00

 **A. CIRCINATUM 'LILY PAD'**- has rounded lobed leaves that look somewhat like a water lily. The nice green leaves are such an unusual shape for our native vine maple. Very Limited. Only a few available. 2 gal. \$ 60.00

5 gal. \$ 150.00

A. CIRCINATUM 'PACIFIC FIRE' - A vine maple with brilliant red stems all winter. This cultivar seems upright growing and the stems almost glow. The fall foliage is red and yellow. 2 gal. \$ 60.00

A. CONSPICUUM 'PHOENIX' - This snake bark maple has fairly large green foliage turning yellow in fall. The bark is a striking red with white vertical stripes. 2 gal. \$ 65.00

A. GRISEUM - Paperbark Maple - Perhaps the finest, and most beautiful of all small trees. Leaves are trifoliolate, beautifully colored with brilliant splashes of gold and red for autumn. The bark splits and peels to reveal a coppery smooth under surface. It is rather slow growing and just becomes more elegant with age. Native to China. We saw the stunning huge tree collected as seed by Ernest Wilson at Arnold Arboretum, Boston. The main trunk is 3' through. WOW!

2 gal. \$ 50.00

A. 'KURENAI JISHII' - is a compact (3-4') Japanese maple with brilliant red purple new growth. The foliage changes to a copper purple red as the season progresses.

2 gal. \$ 60.00

A. JAPONICUM 'ACONITIFOLIUM' - The 'Fern leaf Maple' from Japan has some of the most beautiful fall color each year. This plant grows artistically to 15'-20'. The leaves are deeply cut almost to the petiole. The medium green leaves turn beautiful yellow, orange, and red in the fall.

1 gal. \$ 50.00

2 gal. \$ 60.00

A. JAPONICUM 'GOSSAMER' - Has fine lace leaf foliage for an A. japonicum. The foliage is almost thread-like. When I saw A. 'Gossamer' I thought it was an A. palmatum. Probably the smallest of the A. japonicums.

2 gal. \$ 68.00

A. PALMATUM 'BENI KAWA' - This maple is similar looking to A. pal. 'Sango-Kaku'. The great thing is A. pal. 'Beni Kawa' is dramatically hardier. A. pal. 'Sango Kaku' will regularly have winter damage or die even in western Oregon. The beautiful red stems through out the winter are preceded by green summer foliage and great yellow fall color.

1 gal. \$ 56.00

A. PALMATUM 'BIHOU' - Similar in size and foliage to A. pal. 'Sango Kaku' but instead of the brilliant red stems, A. pal. 'Bihou' has golden stems all winter. Can make a striking tree lit at night. This plant makes a nice small tree.

2 gal. \$ 60.00

A. PALMATUM 'BENI HIME' - Difficult to propagate and slow. So rarely offered. Very dwarf with rosy purple new growth.

1 gal. \$ 70.00

A. PALMATUM 'BUTTERFLY' - This is an old cultivar, but still has its place in modern gardens. The small tree will get 15-18' in time. The leaves are light green with thin cream margins.

2 gal. \$ 58.00

A. PALMATUM 'FAIRY HAIR' - Comes to us from plantsman Talon Buchholz. This maple leaf is so fine it's hard to imagine it's a maple. This plant makes an excellent container specimen or a good plant for the rock garden.

1 gal. \$ 60.00

A. PALMATUM 'HANA MATOI' - Is a fairly new cultivar with dark purple lace leaves. It's similar to many, but look again. There are flashes (patches) of vibrant pink. This is a really pretty Japanese maple. 1 gal. \$ 52.00

A. PALMATUM 'IKANDI' - Was discovered by Talon Buchholz in Gaston, Or. This small upright grower will eventually get 10-12'x4' in many years. The leaves are very small and are pinkish, red in spring. Is a seedling of A. p. 'Alpenweiss'. Named by our friend, Bob Baltzer in Pleasant hill, OR. Limited 3 gal. \$ 120.00

A. PALMATUM 'JAPANESE PRINCESS' - This Talon Buchholz introduction is a seedling of A. p. 'Mikawa Yatsubusa'. The tight growth is accented with pink to peach new growth. In fall, the foliage will turn from green to pink to red. Makes a beautiful container specimen.

Very limited 1 gal. \$ 95.00

A. PALMATUM 'JEDDELOH ORANGE' - The new leaves are rusty orange. In summer it has an orange hue. The lace leaf will be handsome spring-fall.

2 gal. \$ 55.00

A. PALMATUM 'LIL ANNE'S JEWEL' - Named by Del Louks. Del had a nursery for many years in north Eugene. This small upright tree has purple foliage with linear pink markings. This is a fun, interesting tree.

2 gal. \$ 60.00

A. PALMATUM 'MIKAWA YATSUBUSA' - A low broad growing shrub with deep green leaves. The leaves turn a lovely yellow in fall. This plant does well in a container.

2 gal. \$ 52.00

5 gal. \$ 65.00

A. PALMATUM 'MOONFIRE' - Is a moderate growing (12'-14') purple leafed tree. Named by Richard Wolff in the 1970's. Very rich purple foliage and a great red, fall color.

2 gal. \$ 48.00

Nursery only 5 gal. \$ 90.00

A. PALMATUM 'NOEL' - Has purple leaves with bright reddish pink irregular markings. This is a glorious small Japanese maple.

1 gal. \$ 65.00

A. PALMATUM 'ORANGEOLA' - The foliage is orange-red in spring turning deep purple. Later in summer a second growth will add the bright orange-red over the top of the earlier purple foliage. Great red fall color.

2 gal. \$ 56.00

A. PALMATUM 'PEVE STARFISH' - We are thrilled to be able to offer a few of this maple this year. We first saw the plant 2-3 years ago at Talon Buchholz's nursery. This lush deep purple foliated maple has leaves that look like star fish with the margins crimped. Truly beautiful and exciting.

2 gal. \$ 62.00

A. PALMATUM 'RAINBOW' - We have had A. palmatum 'Rainbow' available for three years, but can't keep enough. When customers see the plants in Spring-Fall they can't help but buy. The deep purple leaves have patches of rich pink through the tree. Needs afternoon shade.

1 gal. \$ 58.00

2 gal. \$ 62.00

A. PALMATUM 'RED DRAGON'- Came from Graham Roberts, New Zealand. Said to hold the deep purple foliage color during all but the hottest driest summer. This large weeping lace leaf is tough. 1 gal. \$ 55.00

A. PALMATUM 'RED FILLAGREE LACE' -This lovely maple was discovered in Portland years ago, but hasn't ever become common. The very finely cut leaves are pretty deep purple all summer and turn beautiful red in fall.

2 gal. \$ 55.00

A. PALMATUM 'RYUSEN'- Is a weeping (not cascading) form of A. palmatum. Unless staked, it will grow flat on the ground. This plant needs to be staked and whenever it's released it will weep. Deep green typical A. palmatum leaves that turn pretty red orange in the fall.

2 gal. \$ 50.00

A. PALMATUM 'SEIRYU' – This is an upright green lace leaf maple. This plant has fine textured leaves that look like the lace leaves, but it is an upright tree to 15'. Great yellow fall color.

2 gal. \$ 55.00

A. PALMATUM 'SHAINA' –This is a small upright growing Japanese maple. The glowing red purple foliage is small and completely covers the plant.

2 gal. \$ 60.00

A. PALMATUM 'SHIRAZ'- Selected by Duncan & Davies Nursery in New Zealand. The new foliage is vibrant pink with a purple center to the leaves. In summer, the purple centers are consistent. But, the pink margins will change to cream. This should be a 15'-20' tree.

1 gal. \$ 55.00

A. PALMATUM 'SHISHIGASHIRA' - (Lions Mane Maple) has small deep green leaves that are twisted and crimped at their margins. The leaves will form clumps on the plant making an artistic effect. In fall the foliage turns deep yellow-orange. Our 40-year old plant is 15' X 8' without any pruning.

2 gal. \$ 55.00

5 gal. \$ 80.00

A. PALMATUM 'SHISHI-YATSUBUSA'- Is a dwarf slow growing maple with small densely packed leaves. The new foliage is rimmed with red. Very nice container plant.

2 gal. \$ 65.00

A. PALMATUM 'SUMMER GOLD'- Is an Italian selection from Fratelli Gilardelli Nursery. I have seen this plant for a couple of years, but couldn't believe it wasn't burned in summer. The foliage is a bright golden color all summer on an upright 15' tree. Said to hold color in full sun.

2 gal. \$ 55.00

A. PALMATUM 'TAMUKEYAMA'- One of the darkest foliated of any of the red lace leaves. This cascading lace leaf is a real showstopper summer and fall. This Japanese cultivar was listed in 1710, so tried and tested.

1 gal. \$ 50.00

A. PALMATUM 'TWOMBLY'S RED SENTINIAL'- Is a small leafed small tree. The leaves are deep purple all summer and turn brilliant red in fall. This tree comes from Twombly's Nursery, CT and will get 10'-12'x3' wide.

1 gal. \$ 50.00

A. PALMATUM 'UKIGUMO'- 'Floating Clouds' maple will get 10-12' tall. As a young plant, it looks like a green Acer palmatum. But, as the plant growth slows down, it gets more and more spots on the leaves. Eventually, the plant looks white from a distance. A. 'Ukigumo' is superb in a shaded area as it will really lighten up the area.

2 gal. \$ 70.00

A. PSEUDOPLATANUS 'ESK SUNSET'- (formerly A. 'Eskimo Sunset') - This moderate 20' tree has simply stunning foliage. The maple leaves are dark purple underneath and are deep green splashed with white and pink above. In the sun the leaves absolutely glow with the purple and pink. An A. 'Esk Sunset' is always a conversation piece.

1 gal. \$ 45.00

3 gal. \$ 90.00

A. SHIRASAWANUM 'AUREUM' - This gorgeous maple has golden foliage all summer. In the fall the leaf is even more beautiful having yellow leaves with red margins.

2 gal. \$ 62.00

NOTE: FOR LOCAL CUSTOMERS, WE HAVE A FEW LARGER JAPANESE MAPLES AVAILABLE.

ACTEA

A. 'HILLSIDE BLACK BEAUTY'- This perennial has deep purple foliage to 18" tall all summer. In August, the flowering stems will grow to 60" tall and look like a pinkish/white candelabra. Very fragrant flowers.

1 gal. \$ 16.00

A. 'PINK SPIRE'- This bugbane has dark purple foliage to 18" all summer. Late summer, the flowering stems will grow to 4' with pink sweetly scented flowers.

1 gal. \$ 22.00

AESCULUS

A. NEGLECTA 'ERYTHROBLASTOS'- This chestnut has brilliant pink-white new foliage in Spring. Seems to be a small grower to perhaps 15' in many ears. Rarely offered and we only have 10 plants this year.

1 gal. \$ 60.00

AGAPANTHUS

A. 'BLACK PANTHA'- has violet blue flower on 18" stems. The foliage is narrower than A. 'Storm Cloud'. Flowers are much darker than A. Storm Cloud.

1 gal. \$ 16.00

A. 'STORM CLOUD' -This agapanthus has rich blue flowers in July-August. Our plants have survived 0°F. A. 'Storm Cloud' is deciduous, so completely disappears in winter. Spring comes with narrow deep green leaves followed by clusters of blue flower to 18".

1 gal. \$ 16.00

AGAVE

A. 'BLUE GLOW'- We probably have 40 different species and cultivars in our collection. The deep green leaves have a wonderful orange glow. A. Blue Glow seems to be a slow grower. We grow it in a container under Marj's eve.

1 gal. \$ 22.00

 **A. 'PORCUPINE'**- Came from Yucca Do Nursery in Texas. This small growing agave is only to get 10-12" tall and has thick leaves with only a spine at the top of the leaves. Beautiful as a container specimen. 1 gal. \$ 22.00

 **AMSONIA HUBRECHTII**- is a native American wildflower. In spring, the 18" plant is covered with small blue flowers. The needle -shaped leaves are attractive green all summer. In fall, the foliage turns beautiful golden tones. 1 gal. \$ 16.00

 **ARBUTUS 'OKTOBERFEST'**- is a small growing form of the strawberry arbutus. Will grow to 10'x10' in time and will become a bushy evergreen. In fall, the plant will have small white flowers and ½" red fruit. This is a very pretty large shrub small tree. 2 gal. \$ 30.00

ARCTOSTAPHLOS

A. 'UVA-URSI' WOOD'S COMPACT- This full bushy form of bearberry will get 6"x18". The evergreen leaves are deep green. The plant will have small pink white flowers in spring. In fall, there will be red fruit. We will have several other varieties in spring. 1 gal. \$ 16.00

ARISAEMA

A. FLAVUM - This little charmer has tiny (1/2") rich yellow flowers in late spring. The seedpods flower all summer and will make a nice patch. 1 gal. \$ 15.00

ASTILBE

 **A. 'CHOCOLATE SHOGUN'**- This astilbe has deep almost black purple foliage that is glossy all summer. Makes a great contrast to golden hostas in the woodland garden. 1 gal. \$ 18.00

 **A. 'PERKEO'**- is a 6"astilbe with deep green leaves and rich pink narrow flowers in May-June. 1 gal. \$ 14.00

 **A. 'SUMMER FLASH LIME'**- has chartreuse foliage to 12" tall. The flowers are a soft pink. An easy grower for the shade garden. 1 gal. \$ 14.00

ASTILBOIDES TABULARIS

Has leaves up to 18" across. This large shade plant will give a bold foliage effect even in cold climates (-10° F.). Flowers are small, but foliage is great. 1 gal. \$ 22.00

AUCUBA

A. HIMALAICA- Is a deep, green narrow foliated aucuba. The leaves are 6" long and 1" wide on a 6' plant. This evergreen shrub is one of "the" plants for dry, deep shade. 1 gal. \$ 22.00

A. 'ROZANNIE' - This evergreen shrub is THE plant for that dark spot in your garden. Aucuba 'Rozannie' has glossy dark green foliage. The fruits are large and bright red. We heartily recommend this great evergreen. 1 gal. \$ 22.00

AZARA

A. MICROPHYLLA - *box leaf azara* - Has tiny glossy dark evergreen leaves. This large shrub or small tree has a pretty form as it gets older. A microphylla has been hardy through all winters for 30 years but our plants died back three winters ago, freezing to the ground. The plant is now back to 6'. 2 gal. \$ 22.00

A. MICROPHYLLA 'VARIEGATA'- Is a shrub with tiny (1/4") leaves with fairly broad creamy margins. This evergreen is almost lighter than air. The foliage makes a see through shrub. In early spring the tiny flowers appear and have a vanilla scent. 1 gal. \$ 18.00

BEESIA

B. 'DELTOPHYLLA'- Is an evergreen perennial that will get up to 12" tall. The heart shaped leaves are deep green. The flowers are little puffs on 12" stems. A great plant to grow with ferns, hostas, etc. 1 gal. \$ 14.00
10 for \$ 100.00

BERBERIS

B. 'APRICOT QUEEN'- Is a loose growing evergreen to 6'-8' tall. The deep green glossy foliage is a nice backdrop to the vibrant orange flowers in April. 1 gal. \$ 20.00

B. CALLIANTHA - This evergreen barberry has dark green foliage with silvery indumentum. The flowers are yellow and look like small daffodils. Hardy to 0° F. 2 gal. \$ 20.00

 **B. DELAVAYI**- This great evergreen was grown in the 50's and 60's. We had a huge freeze in 1972 (-12°F) which seemed to have doomed the plant. The small holly- like leaves are deep green year round. The small flowers are brilliant orange and literally cover the plant in March. Has been hardy ever since '72. 1 gal. \$ 22.00

B. REPLICATA - People always see this barberry and ask what it is and want it. Berberis replicata has narrow dark evergreen foliage. The new foliage is rich purple as a highlight all summer over the green mature leaves. Our plant is 10'x 9' after 20 years, has been hardy to 0° F. and survived a flood of 3' in 1996. A really tough plant. 1 gal. \$ 22.00

 **B. THUNBERGII 'ADMIRATION'**- is a small rounded Japanese barberry with brilliant purple foliage and a narrow green margin. Very striking in the garden. In fall, it turns a blazing red color. 1 gal. \$ 20.00

B. THUNBERGII 'BAGATELLE' - A purple cushion of foliage. The foliage is bright purple and turns flaming scarlet in fall. The plant will get 2' X 2' in many years. B. 'Bagatelle' is one of the smallest of the barberries. Takes bright full sun. 1 gal. \$ 20.00

B. THUNBERGII 'CONCORDE'- This dwarf barberry has velvety rich purple foliage all summer. The plant will get to perhaps 2' tall and could be used as a low hedge or in a rock garden for a splash of purple. Found and named by Wavecrest Nursery, Michigan. 1 gal. \$ 22.00

B. WILSONII 'ACE' - Has tiny gray-green leaves all summer. Our largest plant is 2' tall after many years. The plant has small yellow flowers in spring. But, our plant rarely fruits. This foliage plant will turn yellow pink in fall. 1 gal. \$ 18.00

BERGENIA

B. CILIATA 'DIXTER'- I bought this stunning foliage plant from Great Dixter in 1989 as a tiny cutting. The deciduous leaves can get 8-10" long. The oval leaves are covered with hairs. The white flowers will get up to 12" tall. 1 gal. \$ 25.00

BETULA

B. ALBOSINENSIS 'SEPTENTRONALIS' - This birch is simply glorious. Our mature plant is 35 years old and 20'x15'. The flesh, pink, cream colored bark truly is alive during the winter. I see our plant outside my kitchen every day and it's always lovely. Yellow fall foliage follows deep green summer leaves. 1 gal. \$ 45.00

BLETILLA

B. HYACINTHINA - This ground orchid will make large clumps in semi shade. We have literally dozens of flowering stems every spring (June). The flowers are bright purple pink orchids along the stems. 1 gal. \$ 16.00

B. HYACINTHINA 'ALBA' - Is a hardy ground orchid of the easiest cultivation. We grow our plants under our magnolias in semi shade. The early summer flowers are small (2") white orchids with several flowers on each stem. Our plants have thrived through. -12° F. 1 gal. \$ 16.00

 **B. STRIATA 'MURASAKI-SHIKIBU'** - This ground orchid is a pretty shade of lavender pink. Very hardy and easy to grow in shade with hostas, ferns, etc. 1 gal. \$ 16.00

BUDDLEA

B. LORICATA - We found this plant at Hedgerows Nursery many years ago. The green leaves are narrow and have deep veins with white indumentum all year. Our 3' plant is in full sun and will have white flower clusters in late spring. An easy grower but doesn't seed around. 1 gal. \$ 28.00

BUXUS

B. 'GRAHAM BLANDY' - columnar boxwood. Our largest plants are 8'x 1' (with once yearly selective pruning). This evergreen makes a handsome upright column. 1 gal. \$ 25.00

B. SEMPERVIRENS 'AUREO PENDULA' - Is a weeping variegated boxwood. The splashed creamy yellow foliage is distinctively different than any other boxwood. Our plant is 3-4' tall after 35 years. Makes a pretty and interesting plant for a container. 1 gal. \$ 16.00

B. SEMPERVIRENS 'KINGSVILLE DWARF' - Our 50 year old plant is 12x18". This ultimate dwarf shrub has tiny medium green leaves. Our plant grows in semi-shade. 1 gal. \$ 18.00

B. SEMPERVIRENS 'VARIEGATA' - Eventually this boxwood gets to 8' to 10' tall. We use this variegated foliage for flower arrangements year round. Grows well in full shade and full sun, a super adaptable plant. 1 gal. \$ 17.00
2 gal. \$ 22.00

B. 'WATERFALL' - A small green leafed boxwood. Our largest plant in a container is 4' tall and has an interesting slightly weeping form. Slow growing. 1 gal. \$ 16.00

CALLICARPA

C. 'PROFUSION' - The green foliage appears in April followed in July by purple flowers. By October the berries turn purple and the foliage turns yellow. The lustrous purple fruit hold on all winter (until March). Best planted with a light backdrop such as a weathered fence. Wonderful when used as an informal hedge. 1 gal. \$ 24.00

C. 'PURPLE GIANT' - is covered with thousands of vibrant purple fruit. Makes a superb cut flower/fruit. The fall foliage is stunningly vibrant purple. The combination of foliage and fruit is striking! 1 gal. \$ 24.00

CALLISTEMON

C. 'WOODLANDER'S RED' - Has been in the Northwest for many years. The plant dies down if frozen, but comes back quickly. This loose shrub has deep evergreen leaves that are needle like. The powder puff red flowers appear along the stem. 1 gal. \$ 25.00

CALOCEDRUS

 **C. DECURENS 'BERRIMA GOLD'** - Our native incense cedar is a large deep green foliage conifer. C. d. 'Berrima Gold' will be much smaller and the foliage is a brilliant yellow all year. We finally found a source for a few plants of the handsome golden foliaged tree. 1 gal. \$ 40.00

CALYCANTHUS

C. 'ATHENS' - is a light yellow flowering sweet shrub. C. 'Athens' was found and named by Michael Dirr. This is an easy grower with lots of flowers that have the scent of cantaloupe. 1 gal. \$ 28.00

C. 'HARTLAGE WINE' - Richard Hartlage hybridized Calycanthus (then sinocalycanthus) chinensis with C. floridus and created a real winner. The rich purple flowers are 2" across beginning in April and blooming until August here. Must be pruned to make a bushier grower. If pruned it will become a 10' shrub with purple Magnolia stellata - looking flowers for a long period in summer. 1 gal. \$ 32.00

CAMELLIA

C. 'BLACK MAGIC' - We discovered the plant we have been calling C. 'Black Opel' is actually C. 'Black Magic'. Our source had mislabeled the original plant. The flowers are single and deepest maroon. 1 gal. \$ 32.00

C. 'BRIGADOON' - Has larger flowers than C. Donation. These single pink flowers are also darker than C. Donation. The plant seems to be more restrained and smaller than Donation. The deep green foliage is a lovely background to the flowers. 1 gal. \$ 32.00

C. 'BUTTERMINT' - The small creamy yellow C. Kisii hybrid is upright growing and flowers heavily with slightly double yellow flowers. 1 gal. \$ 30.00

C. 'CORAL DELIGHT' - We have had this upright growing camellia in our garden for 20+ years and finally decided to root cuttings. The single flowers are rosy coral pink in March-April. Has been hardy to 5-6 degrees F. 2 gal. \$ 32.00

C. 'DONATION' - The finest of all the camellias we grow. The shrub has rich green foliage and an upright habit. The flowers start late February and continue till mid May. The flowers are soft pink with slightly darker veins. Can grow in almost full sun here. This is a superb plant for the garden. 1 gal. \$ 25.00

C. 'GRIJSII' - is an upright grower with small deeply veined leaves. The flowers are 2" and the white petals are spread forming somewhat a pinwheel effect. Must be a container plant as is said to be tender. But, our plants have with stood 18-20°F. 1 gal. \$ 38.00

C. 'HIGH FRAGRANCE'- This multiple parent hybrid has small (2") white flowers with slight pink flush. The flowers have a pleasant sweet scent form C. lutchsenses

1 gal. \$ 38.00

C. JAPONICA 'UNRYU' - This camellia grows upright to possibly 8'. The foliage is typical C. japonica and the flowers are light red in early spring. However the main reason to grow C. j. 'Unryu' is for the contorted stems. The stems twist at 45° angles, which makes an interesting form.

1 gal. \$ 30.00

 **C. JAPONICA VARIEGATA**- This red flowered camellia has small flowers. The main reason for growing C. j. Variegata is its glossy deep green and yellow leaves. Our original plant is 3-4' tall after many years. Well worth growing for foliage alone.

1 gal. \$ 42.00

C. 'KUJAKU TSUBAKI' - The peacock or weeping camellia is a really fun plant. Our 6' plant is 25 + years old. The narrow foliage is 6" long and ½" wide. The stems weep and have red tubular flowers in spring. C. "Kujaku Tsubaki" makes a superb container plant.

2 gal. \$ 30.00

C. SASANQUA 'WINTER'S SNOWMAN'- This hardy Ackerman hybrid blooms in November. Single white flowers cover the plant and makes an upright hedge or single plant.

1 gal. \$ 28.00

C. 'TINSIE'- An open grower that will get fairly large in time. Our plant is 12'x 4'. The small (2") flowers are red with large white stamens in March-April.

1 gal. \$ 38.00

C. WILLIAMSII 'JURY'S YELLOW' - Not exactly yellow, but a rich cream flower covers this upright camellia. The flowers are very striking against the dark green foliage. We have sold 'Jury's Yellow' off and on for years and we regularly get compliments on its beauty from customers.

2 gal. \$ 34.00

C. 'YULE TIDE'- This standard of the fall blooming camellias is very upright. The dark green leaves make a wonderful background to the bright red flowers. The flowers appear in October-December. A great precursor to Christmas, hence the name.

1 gal. \$ 28.00

CAREX

C. 'BOWLE'S GOLDEN'- this arching sedge has been available for many years. But, still makes a pretty plant. the 18" plant has golden narrow arching leaves all summer. Evergreen, but best cut back in early spring.

1 gal. \$ 14.00

CARPINUS

B. COLUMNARUS 'NANA' - We had this tree for years and sold the last one (a mistake) as it took years to find again. Anyway, this 10-15' tightly branched plant makes a great focal point. The foliage is light green in summer followed by yellow fall color. Makes an interesting plant even when there aren't any leaves.

3 gal. \$ 45.00

CEDRUS

 **CEDRUS ATLANTICA 'HILLIER'S HB'**- is a flat topped Atlantic cedar that will stay very small. The stems slightly weep and make an attractive small shrub.

1 gal. \$ 45.00

CEDRUS ATLANTICA 'SAPPHIRE NYMPH' - Is a moderate size 6'-8' blue atlas cedar. This irregular branching small tree has a lovely wind swept form. The blue needles are beautiful.

1 gal. \$ 40.00

2 gal. \$ 50.00

 **CEDRUS LIBANI 'GREEN PRINCE'**- is an irregular dwarf cedar of Lebanon. Will eventually get 4'-5' tall. The plant was introduced by Wells Nursery in northwest Washington state.

1 gal. \$ 48.00

CERCIDIPHYLLUM

C. 'HERONSWOOD GLOBE'- Originally thought of a dwarf. This katsura tree is perhaps smaller than the species. Our 12' tree is 25 years old. The yellow fall color is lovely.

1 gal. \$ 45.00

C. J. 'BOYD'S DWARF'- Our plant from Jim Fox is 8'x3' after 10+ years. Our plant grows 6"-12" per season. This seems to be a shrubby form of C. japonicum. It's great fun to see such a small plant of the amazing species.

C. 'MAGNIFICUM 'PENDULA'-(Marioka Weeping) Our original tree is 40'x15'. There are several vertical leaders with all the rest of the growth cascading. Looks like a large fountain. One of the glories of our garden.

5 gal. \$ 70.00

C. 'ROTFUCHS' - (Red Fox) has deep purple new growth in the Spring. Our plant holds the color until July. The rest of the Summer it is deep green. In fall C. 'Rotfuchs' turns glorious yellow and pink.

2 gal. \$ 50.00

CERCIS

 **C. CHINENSIS 'AVONDALE'**-We only grow one redbud as our native Cercis 'Canadensis' doesn't like our cool summers. It wants consistent heat. Hovers C. c 'Avondale' is the Chinese redbud and covers itself with vibrant pink flowers by the hundreds.

2 gal. \$ 58.00

CHAENOMELES

C. 'HOLLANDIA' - We have had this great quince for years. The 2" flowers are as pretty deep red color. We seem to be able to root plants only every 2-3 years. So we don't always have plants available.

1 gal. \$ 28.00

CHAMAECYPARIS

C. LAWSONIANA 'WISSELS SAGUARO' This beautiful conifer looks like a dark green saguaro cactus. It will grow outside the desert and be a real showstopper in the garden. These plants are grafted so are more expensive than cuttings, but are resistant to phytophthora root rot. We have 20 plants, so order early

1 gal. \$ 45.00

3 gal. \$ 90.00

C. NOOTKATENSIS 'GREEN ARROW'- Our original tree is 30'x3'. This upright conifer has weeping braches that clothe the main trunk. Our only problem is we didn't put in a grouping 30 years ago. We only have 10 plants available.

3 gal. \$ 65.00

C. NOOTKATENSIS 'SPARKLING ARROW' - This plant looks like C. n. 'Van Den Akker' but has blotches of creamy white in the deep green weeping foliage. The color holds in full sun and semi shade.

1 gal. \$ 50.00

2 gal. \$ 60.00

C. OBTUSA 'BUTTERBALL'- Is a dwarf (6 -8" in five years) cypress. The golden foliage is very attractive year round. We find our plants need semi-shade or afternoon shade.
1 gal. \$ 35.00

C. OBTUSA 'GOLD DROP'- This American selection will make a flat topped arching plant with pretty fan shaped, dark green leaves.
1 gal. \$ 32.00

 **C. OBTUSA 'GOLD POST'**- is a very upright growing hinoki cypress. The golden fans of foliage are attractively twisted on this small plant.
1 gal. \$ 45.00

 **C. OBTUSA 'GOLDEN HAGE'**- is a miniature golden foliated cypress. The tiny growth makes the perfect plant for a container or trough. We don't suggest planting in the ground unless really protected. Needs afternoon shade or will burn.
Welsh pot \$ 40.00

C. OBTUSA 'HAGE' - Has fan shaped deep green foliage on a small shrubby form. May get 2' in 20+ years. Makes a pretty shrub for the semi shade either in the soil or container
1 gal. \$ 25.00

C. OBTUSA 'LEPERCHAUN' - A very dwarf mounding conifer. Makes a great container plant as well as a background for the light green new foliage.
1 gal. \$ 25.00

C. OBTUSA 'MAUREEN'- Is a low growing conifer with deep green fan shaped needles. Our plant is 5-6 years old and 6" x 12". This is a spectacular plant.
1 gal. \$ 30.00

C. OBTUSA 'MELODY' - A soft lacy open evergreen. The muted green and yellow foliage is very attractive all year. Should get 8-10' tall and make a pretty addition to anyone's garden. Can grow in full sun and maintain the golden color.
1 gal. \$ 25.00

 **C. OBTUSA 'MOONSHINE'**- This Talon Buchholz selection is an upright growing small shrub. The foliage has dark green needles with splashes of creamy white.
Welsh pot \$ 50.00

C. OBTUSA NANA 'GRACILIS' - Dwarf Hinoki Cypress. Our 40+ year old plant is 8' tall and has been pruned out to display its structure as well as the lovely evergreen foliage.
1 gal. \$ 22.00

C. OBTUSA 'RAINBOW' - This small growing chamaecyparis has an irregular growth habit to 2'-3' over many years. The foliage is a mixture of green and chartreuse, making a rainbow effect.
1 gal. \$ 25.00

 **C. OBTUSA 'REZEK'**- Our plant is 25 years old and is 24"x12". The beautiful deep green needles grow in fan shape whirls. Rarely offered as it is very slow, but incredibly beautiful.
1 gal. \$ 45.00

 **C. OBTUSA 'RIGID DWARF'**- is an upright narrow 4-5' plant. The deep green fan shaped needles create a small focal point.
2 gal. \$ 35.00

 **C. OBTUSA 'SNOWKIST'**- Very limited number available. Needs plenty of light to get the variegation to show up. The plant will be slow growing with deep green needles and splashes of white variegation.
1 gal. \$ 42.00

 **C. OBTUSA 'SPIRALIS'** -has swirling deep green needles on somewhat twisted stems. This upright grower will get 4' tall and 2' wide.
1 gal. \$ 25.00

 **C. OBTUSA 'SPIRITED'**- is an upright golden foliated C. obtusa variety. Will get 3-4' in time.
2 gal. \$ 45.00

C. OBTUSA 'STONEHAM' - A low growing mound, 1/2' to 1' in 15 years. The sprays of needles are deep forest green with light green new growth each spring – early summer. This is a superb container plant. Which is how we grow all of our smaller conifers. In our garden, their bigger neighbor will swamp these small plants.
1 gal. \$ 25.00

 **C. PISIFERA 'BABY BLUE ICE'**- Our upright plant is 6'x2' after 10 years. I see the plant every day as I come down my steps. The blue foliage is soft to the touch and is fluffy looking.
2 gal. \$ 55.00

CHIONANTHUS

C. VIRGINICUS- The fringe tree is a beautiful native shrubby tree. We find this plant is far superior to the Chinese native C. retusus, which doesn't bloom for us. C. virginicus covers itself in June with thousands of shredded silk looking white flowers.
1 gal. \$ 24.00

CHOISYA

C. 'AZTEC PEARL' - This has dark green, maple-like leaves year round. The plants get 4' tall and have white, citrus scented flowers during winter months. Hardy to perhaps 0° F. Grows very nicely along the west coast and coastal SE U.S.
1 gal. \$ 22.00

 **C. 'BLUE STONE'**- is a new Mexican orange that has needle like deep green leaves. Much thinner leaves than C. 'Aztec Pearl' will have fragrant citrus scented white flowers in the spring.
1 gal. \$ 22.00

C. TERNATA 'SUNDANCE' - C. 'Sundance' grows to 6' tall and has golden yellow leaves year round. The flowers are a sweet citrus scent in early spring. Needs some shade in afternoon. Superb with Cornus 'Midwinter Fire'
1 gal. \$ 24.00

CLETHRA

C. ALNIFOLIA 'HUMMINGBIRD' - is a 18" tall shrub with very fragrant white flowers in July-August. C. Hummingbird is a bushy plant that turns lovely golden yellow in October.
1 gal. \$ 20.00

C. ALNIFOLIA 'RUBY SPICE' - A summer sweet with rich pink flowers in August. The narrow plumes of flowers are sweetly scented. This 4'-5' shrub is attractive spring – fall. The yellow fall foliage makes a great finale after the summer flowers.
2 gal. \$ 24.00

C. BARBANERVIS 'TAKEDA NISHIKI'- Plants are amazing! We have tried cuttings of C. b. "Jane Platt with zero success. However, we have grown these plants with 95% rooting. The layered stems are really beautiful with the pink new growth and white summer foliage. Said to do really well in full sun.
1 gal. \$ 30.00

CLERODENDRUM

 **C. 'CARNIVAL'**-We have had a plant of this variegated shrub for years but haven't been able to propagate it. We found these plants as rooted cuttings. The heart shaped leaves are pretty yellow and green all summer.
1 gal. \$ 28.00

COMPTONIA

C. ASPENIFOLIA- is a suckering shrub to 36". This plant from Canada is amazingly hardy. *C. asplenifolia* is probably the hardiest plant we grow. The narrow foliage is serrated and 3"x ½". The foliage has an herby scent. Is a nice foliage filler in cut flower arrangements. 1 gal. \$ 25.00

COROKIA

C. COTONEASTER- The wire netting shrub comes from New Zealand. It's an excellent plant for containers. The zig-zag stems are dark; almost black. The gray green leaves are tiny. Small, bright yellow flowers cover the plant in spring. 1 gal. \$ 18.00

CORNUS

C. ALTERNIFOLIA 'ARGENTEA' - This small shrubby dogwood grows to 12' x 10' and has small white margined green leaves. The overall effect is of a white wedding cake. The foliage grows in tiers. Flowers and fruit are in small clusters. 1 gal. \$ 60.00

C. CONTROVERSA 'VARIEGATA' - The wedding cake dogwood is one our most beautiful trees. Our original tree is 35-40'. We brought our plant from Holland in the late 70's. The layers of white and green foliage is amazing. The more shade, the more the plant becomes layered. 1 gal. \$ 65.00

 **C. 'EMPRESS OF CHINA'**- is an evergreen dogwood from our friend John Elsley's garden in Greenwood, S.C. John found this fine cultivar at a local big box store. The small tree will be covered with thousands of white bracts in late spring. 2 gal. \$ 50.00

C. KOUSA 'AKATSUKI' - A sport of *C. k.* 'Satomi' from Japan. The leaves have a green center with wide irregular margins of creamy white and pink. The flowers are not totally pink, but with the attractive variegation we can't expect everything. 1 gal. \$ 52.00
2 gal. \$ 62.00

C. KOUSA 'FIREWORKS'- is said to have vibrant pink flowers. In fall, the foliage is brilliant purple red. Very hardy and disease resistant. 1 gal. \$ 60.00

C. KOUSA 'HEARTHROB' - Has been the best of the *C. kousa* pink cultivars for us. We have a 12'x12' plant in Eric and Dawn's garden. The bracts cover the plant almost to the point of obscuring the foliage. The bracts are rich pink. 2 gal. \$ 60.00

 **C. KOUSA 'SCARLET FIRE'**- is supposed to be the brightest red (pink) flowering *C. kousa* available. Haven't seen a plant blooming but pictures are beautiful. 1 gal. \$ 60.00

C. KOUSA 'SUMMER FUN' - This great offering from Talon Buchholz has accentuated long leaves. The light green leaves have a broad creamy variegated margin all summer. The foliage holds the variegation in sun or shade. In the fall the cream margin turns rich glowing pink. 2 gal. \$ 55.00

C. KOUSA 'SUMMERCOLD'- This variety has brilliant yellow margins all summer. In fall, the center (green) of the leaf turns brilliant purple red and the yellow margin turns bright pink. Flowers are white, but it's all about the foliage. 2 gal. \$ 60.00

C. KOUSA 'VENUS'- Marietta O'Byrne has kept after us to grow this dogwood and we finally got to it. The flowers are very large white in May & June. We only have 10 plants of *C. 'Venus'* and think it will sell quickly. So order early. Where can we put another tree in our garden? 2 gal. \$ 60.00

C. SANGUINEA 'COMPRESSA' - According to Paul Cappelletto and Don Shadow's Dogwood book, this is a "Bizarre little upright plant". Without a doubt this is a plant geeks plant." I'm glad I'm a plant geek! The upright growth to 6'-8' will be at most 1' wide. We use our plants as an exclamation point to add height to the border. The leaves literally grow one on top of the other. 2 gal. \$ 28.00

C. SANGUINEA 'MIDWINTER FIRE' - We listed *C. 'Midwinter Fire'* last year and totally underestimated the demand. This year we have quite a few in one and two gallon sizes. Any way, this great plant has glorious orange, red and yellow stems all winter. We grow our plants in the ground for a year then prune hard each year to promote the brightest stems. Nice yellow fall foliage color. 1 gal. \$ 20.00
2 gal. \$ 35.00

CORYLOPSIS

C. 'LONGWOOD CHIMES'- From Longwood Gardens, PA. This larger grower blooms with light yellow flowers. The plants flower 2 weeks later than most corylopsis. 1 gal. \$ 24.00

C. PAUCIFLORA - One of the finest of all shrubs we grow, it has a grace about it year round. In winter the branches form a lacy effect with dark colored swollen flower buds. In March the light yellow racemes cover the plant. 2 gal. \$ 24.00

C. SPICATA AUREA- The golden spike winter hazel. This lovely early spring flowering shrub is covered with 2" yellow racemes. Following the flowers there are glorious golden yellow pleated leaves. The two seasons of blooms and foliage make a nice addition to the woodland garden. 1 gal. \$ 24.00

C. CORYLOPSIS WILLMOTTIAE 'SPRING PURPLE'- We got our original plant from Hilliers (England) in the 80's. The yellow pendant flowers cover the 10' shrub. The new foliage is rich purple and the leaves will be purple through a good part of summer. Seems more tender than other corylopsis. 1 gal. \$ 28.00

CORYLUS

C. 'BURGUNDY LACE'- This hazelnut is a large shrub or small tree. The foliage is fairly long and narrow with deep indentations. The deep purple new foliage and the deeply cut leaves are very attractive. 1 gal. \$ 30.00

COTINUS

C. 'GRACE'- Is one of our best discoveries. We first listed *C. 'Grace'* in 1993, and are still impressed with how great this shrub can be. We got this Hillier named hybrid in the mid 1980's as a one foot cutting. Our original plant is cut back hard each spring to 6' and by the end of the season is 12-14' high. The large mid purple leaves are pretty all summer, and by fall they turn the most amazing pink, red, orange and purple. As a cut back plant we get only a few flowers (no great loss) but the foliage is superb. 2 gal. \$ 40.00

C. 'GOLDEN SPIRIT' This beautiful moderate size smoke tree has the most glorious golden foliage all summer. In the fall it turns bright yellow. The flowers have a purple tint making a pretty show through much of the summer.

1 gal. \$ 38.00

C. 'OBVATUS'- This American native smoke bush can eventually become a tree. I remember seeing a plant many years ago at Jane Platt's garden that was literally a showstopper. In fall, the green leaves turn an unbelievable pink-yellow.

1 gal. \$ 35.00

CROCOSMIA

C. 'FIREBIRD' - This rich orange bulb for the late summer garden is indispensable. Our clump is growing under the edge of Cornus kousa 'Gold Cup' and consistently gives a great show.

1 gal. \$ 16.00

C. 'HELLFIRE'- We got this stunner from Far Reaches Nursery several years ago. C. 'Hellfire' is a tall grower (3') with red flowers in late July. Rather than the typical burnt orange flowers, these flowers are an interesting red color.

1 gal. \$ 18.00

C. 'SOLFATARE'- Chocolate foliage on 2' plants. The iris like foliage makes a nice foil for the yellow flowers. We like grow C. 'Solfatare' with G. 'Rozannie'.

1 gal. \$ 16.00

C. 'STAR OF THE EAST' - Interesting golden yellow flowers 2" across. The flat flowers have a distinctive white center. A very pretty bulb for August-September.

1 gal. \$ 16.00

CRYPTOMERIA

 **C. 'BLACK DRAGON'** is an Islei Nursery selection that should get to 6'x3' in 10 years. The new growth is light green and will turn very dark green as the season progresses. A great plant for the garden or container.

1 gal. \$ 32.00

C. 'SPIRALIS'- (Granny's ringlets) This conifer has dark green small curled needles. The needles curve around the stem making an interesting look. Don't know ultimate size (8'-10')? But, C. spiralis makes an excellent container plant.

1 gal. \$ 25.00

CUPRESSUS

C. 'GREENSTEAD MAGNIFICENT'- Is a low growing cypress that has lovely light gray green needles. This fine conifer is rarely seen in gardens. We only find it available every few years.

1 gal. \$ 50.00

 **C. SEMPERVIRENS** (Italian Cypress)- This columnar conifer is grown through the Mediterranean regions all over the world. It's amazing that it is hardy here. There are old plants in Eugene that have survived -12°. These small plants will grow fast and very full and bushy.

2 gal. \$ 35.00

CYCALAMEN

 **C. COUM. 'SILVER LEAF FORM'**- This handsome corm is dormant during spring and summer. In fall, the foliage reemerges with green and silver markings. Worth growing for the foliage let alone having vibrant pink-white flowers all winter.

4" \$ 12.00

C. HEDERIFOLIUM 'SILVER LEAF FORM'- is also dormant all spring and summer. In August, the pink to white flowers will appear sporadically until the season cools. The foliage will be beautiful all fall and winter.

4" \$ 12.00

CYTISUS

C. BATTANDIERI- Our sources dried up for the pineapple broom over the years. All of a sudden we remembered that our original plant was grafted on Laburnum (golden chain). Anyways, this large shrub has gray green hairy leaves and short golden chains. The flowers have a pineapple scent in late spring. Has been hardy here to -12°.

1 gal. \$ 42.00

DAPHNE

D. 'CAROL MACKIE'- This deciduous shrub will get 4'x4' with variegated foliage. The fragrant white, pink flowers cover the plant each spring. Very hardy and beautiful plant.

1 gal. \$ 28.00

2 gal. \$ 32.00

D. 'ETERNAL FRAGRANCE' - (D. caucasica x D. collina.) According to Robin White this plant is probably the same cross as D.'Jim's Pride.' The plant will flower in April and May with white flowers with some pink color on the perianth tube. Our plants bloom sporadically after that through summer and into fall. The plant will grow to 2' and make a great plant in sun and good drainage.

1 gal. \$ 26.00

D. GENKWA 'HACKENBERRY GROUP' - Rarely offered, this lovely deciduous shrub covers itself with lovely lavender flowers in April. Called the "lilac daphne". This plant is a showstopper each spring.

1 gal. \$ 32.00

D. 'JIM'S PRIDE'- This Daphne is the longest blooming plant in our garden. The flowers start in March and still flowers in November. The 3' plant has gray green small leaves and white fragrant flowers. Very hardy and sun tolerant.

1 gal. \$ 28.00

D. MEZEREUM - This tough plant will grow even in very cold areas. Our plants came from Yakima, Washington for years, we have the first flowers at New Years and they last until mid February. This is one of the hardiest shrubs we grow in full sun to semi shade. Not long lived, but once established it will seed enough to always have a neat show each winter.

1 gal. \$ 20.00

D. ODORA 'AUREOMARGINATA' - To most people the best fragrance of any shrub. The small purple and white flowers appear in February - April and the scent can be noticed 20 feet away. Makes an evergreen shrub with golden margins on the foliage. Can be kept in a large container.

1 gal. \$ 26.00

D. ODORA 'ZUIKO NISHIKI' - The deep pink flower buds open to pure white inside the flowers. We have read that D. 'Zuiko Nishiki' is hardier than other forms of D. odora. Any clones of D. odora have an unbelievable scent to the flowers.

1 gal. \$ 26.00

D. TANGUTICA- This evergreen Daphne will get 2x3'. We grow our plant in full sun or semi shade. The purple and white flowers appear in April-May and have a light Daphne fragrance.

1 gal. \$ 26.00

D. 'SUMMER ICE'- Named by Bob Tichnor, of Aurora, Oregon. This long blooming deciduous daphne has golden variegated leaves. D 'Summer Ice' is the same hybrid as D. 'Jims Pride'. But, is variegated and blooms for a shorter time.

1 gal. \$ 28.00

D. 'WILHELM SCHACHT'- is a small (18'x18') evergreen shrub. The deep green small leaves make a good backdrop to the rich purple clusters of flowers. Needs full sun to flower heavily.

1 gal. \$ 30.00

DAPHNIPHYLLUM

D. MACROPODIM- This evergreen tree is handsome year round. The dark green leaves are polished and have dark purple petioles. The flowers are tiny purple in spring. This tree is very tough. We have had it below 0°.

1 gal. \$ 32.00

DAVIDIA

D. INVOLUCRATA 'AYA NISHIKI' - Is a variegated dove tree that has stunning new growth that is gold and green. As the season goes on the color fades but is still attractive until fall.

2 gal. \$ 150.00

D. INVOLUCRATA 'LADY SUNSHINE' - This stunning foliage plant has green centers to the leaves with creamy yellow broad margins. We find the plant grows best in filtered shade all day. We haven't seen bracts yet but the foliage is beautiful so who cares?

1 gal. \$ 150.00

D. INVOLUCRATA 'SONOMA' - This flowering dove tree came from Sonoma Horticultural Nursery. The original tree had exceptional bracts and luckily the owners got it out into the nursery business. Bracts are 8-10" long and the grafted plants will bloom at 18 inches tall. Any of the plants we are selling can bloom next May. Because of the grafting and scarcity, these plants are limited and high priced.

2 gal. \$ 110.00

DEUTZIA

D. 'CANDIDISSIMA' - A large growing shrub (12'x12' in time). The flowers appear by the thousands in April-May. The flowers are pure white and double. We haven't had this plant for a while, but so many people ask for the plant when in bloom.

1 gal. \$ 20.00

D. 'MOUNT ROSE'- This 6-8' Deutzia has soft pink clusters of flowers in May-June. The flowers cover the plant and are beautiful in season.

1 gal. \$ 20.00

D. NANKIANA 'NIKKO'- This low grower has narrow deep green foliage. In fall, the leaves turn an interesting purple yellow. In late spring, the plant covers itself with thousands of white flowers. D. 'Nikko' will get 18"x36" in time and grows in full sun.

1 gal. \$ 16.00

DIOSPYROS

D. KAKI 'FUYU'- We have enjoyed seeing persimmons in gardens the last several years. We finally planted one in our garden as an ornamental last year. The deep green leaves are glossy all summer. In fall, the large orange fruit are glorious. Makes an interesting fruit tree as well as an ornamental.

1 gal. \$ 40.00

DISANTHUS

D. CERCIDIFOLIUS - This is a superb 12'-15' shrub grown for its stunning purple, red, and orange fall color. The heavily veined foliage is very dark green and leathery during summer. In late August the leaves start turning purple and all through the fall just keeps getting better. Disanthus cercidifolius is a member of the hamamelis family and has very small, deep maroon flowers in fall. Has been hardy to at least -20° F. in Illinois. See Michael Dirr's "Manual of Woody Landscape Plants". Disanthus is one of his favorites.

1 gal. \$ 38.00

D. CERCIDIFOLIUS 'ENA NISHIKI'-This variegated leafed Disanthus can be truly striking. The foliage is medium green with irregular white margins. In fall, the green center turns deep purple and the margin turns pink. The 10-12' shrub is an interesting change from D. cercidifolius.

1 gal. \$ 38.00

DISPORUM

D. 'GREEN GIANT'- Larger than D. 'Night Heron'. Makes an upright perennial for the woodland garden.

1 gal. \$ 20.00

D. LONGISTYLUM 'NIGHT HERON' - Similar to D. 'Green Giant' but smaller growing. The dark purple new growth turns deep green by summer. The greenish white flowers are small bells.

1 gal. \$ 20.00

DISTYLIUM

D. MYRICOIDES - An evergreen witch hazel with deep green narrow leaves. The 3'-4' tall plant makes an arching shrub that will bloom with red puffs of flowers in early spring. Can be kept pruned to 18" and will make an attractive shrub for the woodland garden.

1 gal. \$ 25.00

DRIMYS LANCEOLATA - This Chilean native has small lance-shaped dark evergreen leaves. The dark foliage is high lighted by the purple-red stems. Plants we've seen are only 6'-8' tall, but may get bigger. We grow as handsome container plants. Plants in Eugene have survived in the ground for many years in a more protected area than our garden. The flowers are small and white but makes a nice show on the plants.

1 gal. \$ 28.00

EDGEWORTHIA

E. 'CHRYSANTHA' -This Daphne relative is a 4' x4' deciduous shrub. The leaves are large and look somewhat tropical all summer. In February-March the plant will be covered with Daphne looking flowers. The golden yellow flowers are lightly lemon scented. Nice plants. Most should bloom next spring.

2 gal. \$ 38.00

E. 'PAPYPHERA'- This shrub will be smaller and more restrained than E. chrysantha. The leaves are 3"x1" wide. The golden yellow flowers are pendant and bloom February-March. Needs protection with us. We grow among evergreen shrubs.

2 gal. \$ 38.00

ELEAGNUS

E. PUNGENS 'CLEMSON VARIEGATED' - is a more subtle form of variegated Eleagnus than E. 'Gilt Edge'. This tough adaptable evergreen will create a show year round.

1 gal. \$ 24.00

E. PUNGENS ‘HOSOBA FUKURIN’- Has narrow variegated (creamy white) evergreen leaves. This tough plant will thrive in full sun or dry shade. The foliage makes a great plant for cut stems for flower arrangements.

1 gal. \$24.00

ELEUTHROCOCCUS

E. SIEB. VARIEGATUS- One of J.C. Raulston’s ‘care’ packages in the 80’s. This plant is almost indestructible. Our largest plant is 6’x6’ and has small variegated leaves. The plant will grow in full sun to deep shade. The overall shrub effect is creamy white. There are several cultivars called variegatus but this has the best foliage of all.

1 gal. \$35.00

EMBOTHRIUM

 **E. COCCINEUM**- We have taken a couple years off of having Embothrium coccineum and E. ‘Inca Flame’. This amazing plant is a small tree with vibrant mandarin orange flowers in June. This member of the Protea family comes from southern Chile. Will only grow from Vancouver B.C. to San Francisco area. Please don’t waste your money east of the Cascades as they will not survive!

1 gal. \$35.00

 **E. ‘INCA FLAME’**- is a larger lowering and growing small tree than E. coccineum. The leaves are perhaps double the size of E. coccineum. Named by Duncan & Davies Nursery, New Zealand.

1 gal. \$35.00

ENKIANTHUS

E. CAMPANULATUS ‘SUMMER HILL’ – Is an upright growing enkianthus. The flowers are fairly small but the fall color is superb. From Summer Hill Nursery.

1 gal. \$32.00

E. SERULATUS - We got a care package from J.C. Raulston in the late ‘80’s and a cutting of E. serrulatus was enclosed. We planted the plant and it has slowly grown to 5’-6’ with large leaves (bigger than E. campanulatus). The flowers are white urns like E. perulatus, but are huge in comparison. Great red- orange fall color. We haven’t seen any other offering in the U.S.

1 gal. \$32.00

EPIMEDIUM

Please note all epicedium's are full plants in 1 gal.

E. ‘AKEBONO’ - Has white flowers in March on a small 4” growing perennial.

1 gal. \$18.00

E. ‘AMBER QUEEN’- This handsome plant gets about 12” tall and is covered with amber colored flowers in March. When we had this plant 2 years ago. When they bloomed, the plants sold out in just days.

1 gal. \$22.00

E. ‘BLACK SEA’ -Winter foliage on this evergreen turns almost black. Principally grown for its foliage but the flowers are soft yellow with orange veining.

1 gal. \$18.00

E. ‘CHERRY TART’ - Has pink inner sepals and bright red spurs. Semi evergreen. This plant spreads slowly.

1 gal. \$18.00

E. CHOCOLATE- Has white flowers with chocolate colored centers. Heavy flowering.

1 gal. \$22.00

E. ‘DOMINO’ - Flowers are white and purple are held above beautiful mottled foliage. This evergreen perennial will make a beautiful plant for the woodland garden.

1 gal. \$20.00

E. ECALCARATUM - A low growing evergreen epimedium. The flowers are found as yellow sprays making a pretty small space ground cover for the woodland garden.

1 gal. \$15.00

E. ‘ENCHANTRESS’ - This Elizabeth Strangman hybrid has silvery pink flowers above the narrow evergreen leaves.

1 gal. \$18.00

E. X PERRALCHICUM ‘FROHNLEITEN’ - Brilliant golden yellow flowers on stems up to 12” tall. The evergreen foliage holds up well during most winters, but we take hedge shears to the plants in January-February. One of the most vigorous growers in the garden.

1 gal. \$16.00

E. GRANDIFLORUM - This 6” epimedium has white flowers in spring. The slowly spreading woodlander is a good companion for ferns, spring bulbs and other shade plants.

1 gal. \$16.00

E. GRANDIFLORUM ‘LILAFEE’ - Has soft lavender flowers on 6-8” plants.

1 gal. \$16.00

E. ‘JOHN GALLAGHER’ - Has pretty pink flowers in March – April. Our plant is fairly slow to spread.

1 gal. \$16.00

E. LEPTORRHIZUM - A low grower to perhaps 4-6” with soft lavender flowers.

1 gal. \$18.00

E. LITTLE SHRIMP - This low growing (6” or less) epimedium has light pink flowers just above the foliage in spring. Makes a nice small growing ground cover in semi-shade or full sun (not south facing)

1 gal. \$16.00

E. MYRIANTHUM ‘MOTTLED MADNESS’ - Has mottled large leaflets like camouflage. The foliage color lasts only a short time in spring, but reappears in fall.

1 gal. \$20.00

 **E. OGISUI**- Has lovely white flowers with bronze new growth. This species was introduced in 1993 from China.

1 gal. \$20.00

 **E. ‘O’KUDA’S WHITE’**- Back and available. We got this epimedium many years ago from WE-DU Nursery in North Carolina. The low growing plant is covered with large white flowers in spring.

1 gal. \$18.00

E. ‘ORANGE QUEEN’- Has orange and yellow flowers. The evergreen foliage will persist all winter, but as with all our Epimediums, we cut them back in January to have beautiful new growth with the flowers.

1 gal. \$18.00

E. ‘ORION’ - We got this beautiful plant from We Du Nursery over 25 years ago. The large foliage is slightly shorter than the dark purple red flowers. A robust plant that forms beautiful clumps.

1 gal. \$18.00

E. PAUCIFLORUM - A small growing epimedium with pretty white flowers. So far our plant is fairly open growing, but still attractive.

1 gal. \$18.00

E. ‘PIERRE’S PURPLE’ - A mid purple epimedium on a 8”-12” plant. This clump former will slowly form a nice plant with lots of purple flowers.

1 gal. \$20.00

E. ‘RED QUEEN’- is a form of E. grandiflorum with rich red flowers. Said to be magnificent in several descriptions. So must be nice.

1 gal. \$22.00

E. 'RUBRUM' - Has soft reddish pink flowers on a 12" plant. This variety is really easy to grow and is adaptable.

1 gal. \$ 16.00

 **E. STELLATA 'LONG LEAF'**- has small white flowers with narrow leaves worth growing for the foliage alone.

1 gal. \$ 22.00

E. 'SWALLOWTAIL' - Has burgundy margins on the new foliage. Flowers are lavender pink with long spires on the flowers.

1 gal. \$ 18.00

E. 'THUNDERBOLT' - Has bright yellow flowers in March followed by large leaves with purple blotches. 'Thunderbolt' looks beautiful for its fall foliage alone.

1 gal. \$ 16.00

E. VERSICOLOR 'SULPHUREUM' - Has soft creamy yellow flowers on a 6"-12" plant. The foliage is best cut down late winter so the flowers can show their best.

1 gal. \$ 16.00

E. WARLEYENSE 'ORANGE KING' - Has brilliant orange flowers in March-April. this easy woodland perennial makes a splash of color each spring.

1 gal. \$ 18.00

E. WUSHANENSE 'SANDY CLAWS'- Is a slowly spreading evergreen barron wort. The flowers are white, but not exciting. However, the foliage is spiny, long and deep green in summer-fall. The new growth is chocolate colored. A very beautiful foliage plant.

1 gal. \$ 28.00

E. YOUNGIANUM 'VIOLICUM' - Has lovely small flowers of light purple-violet. The foliage is dark green.

1 gal. \$ 15.00

EUCRYPHIA

E. GLUTINOSA - The only eucryphia we grow. We tried the evergreen species and they always die with cold and are difficult in containers. E. glutinosa has beautiful white flowers in July. Our 15' shrub is in full afternoon sun and is thriving. It has withstood 5-6 degrees. In fall, the deciduous foliage turns red-yellow.

1 gal. \$ 28.00

gosslerfarms.com
541-746-3922

EUCOMUS

 **E. 'SPARKLING BURGUNDY'**- This interesting bulb dies down each fall. In spring, the deep purple leaves emerge and are vibrant purple. The flowers are small pineapple looking on 2' stalks.

1 gal. \$ 18.00

EUONYMUS

E. LATIFOLIUS -Our 10' tree has big, pink fruit in August-October. Out of the deep pink fruit, spill orange seeds. The fall foliage will turn yellow-pink.

2 gal. \$ 22.00

FERNS

We have expanded our selection of ferns dramatically. We have put them all together as a category. These easy beautiful plants are a must for any garden. We can't ever put too many ferns in our garden so hurry and buy these plants from us so we don't get carried away. Please check out Sue

Olsen's "*Garden Ferns*". It's a masterpiece!

* Please Note: We use the Latin names on the ferns as there are so many confusing common, similar names. We try to also give the common name.

ADIANTUM SHASTENSE Was first collected as an herbarium collection 100 years ago, but not introduced to the garden world until very recently. This evergreen maiden hair fern is low growing and seems to have fairly wide leaflets. This is perhaps the first mail order offering ever!

1 gal. \$ 22.00

ADIANTUM VENUSTUM - This superb ground covering fern has small round leaflets. The light green to bronze new growth grows over the top of the darker green mature foliage. This fern makes a lovely ground cover at the foot of rhododendrons.

1 gal. \$ 12.00

10 for \$ 90.00

 **ADIANTUM X MARIESEI**- is a hybrid maidenhair fern. The fronds will get up to 1' tall. The lacy foliage is really beautiful all season.

1 gal. \$ 18.00

ATHYRIUM NIPPONICUM 'GODZILLA' - This giant painted fern comes from Tony Avent, Plant Delights Nursery. The purple, gray and green painted fern grows much larger and even more spectacular than *Athyrium nipponicum* 'Pictum'.

1 gal. \$ 16.00

BLECHNUM

B. CHILIENSE - A southern Chilean native that will have large evergreen leaves with large rounded leaflets. This 2'-3' fern is for milder climates. Our plant has been here for 15 years and survived 5°-10° F.

1 gal. \$ 22.00

B. PENNA MARINA - A (4") spreading deer fern. Plants are slow spreading and make a pretty evergreen ground cover. We made a planting between a fence and a wall in Eugene and its made a wonderful show.

1 gal. \$ 10.00

5 for \$ 45.00

B. SPICANT - Our northwestern deer fern grows in the Cascades and Coast Range. This evergreen has new fronds that are vertical and the older fronds are horizontal on the ground. This wonderful fern has black stems with deep green foliage. Beautiful plants.

1 gal. \$ 16.00

 **CONIOGRAMME EMEIENSIS 'GOLDEN ZEBRA'**- The variegated form of bamboo fern from China. This upright deep evergreen fern has golden variegated lines through the leaf.

1 gal. \$ 22.00

CYRTOMIUM FORTUNEI - Is a hardy 2' evergreen fern. The foliage is medium green on upright fronds. This is an easy evergreen fern that does well in many areas

1 gal. \$ 16.00

DRYOPTERIS

 **D. AFFINS CRISPA GRACILIS**- is a fun little fern that gets 6"-10" tall and wide. The evergreen fronds are deep green and very ruffled.

1 gal. \$ 17.00

D. CYCADIANA- Shaggy Shield wood fern—Is a robust 18-24" evergreen fern. The vase shaped fern is very attractive year round. 1 gal. \$ 16.00

D. ERYTHROSORA 'BRILLIANCE' - Has evergreen leaves year round. In spring and summer the foliage is brilliant copper orange. Our plant is 1x1' and is a wonderful contrast to hostas and other woodlanders. 1 gal. \$ 14.00

D. LEPIDOPODA- Sunset Fern- Is a handsome evergreen fern with lovely coppery bronze new fronds. One of our favorite ferns, but very hard to find. The big growers don't propagate. So, listen propagators, get to growing. 1 gal. \$ 20.00

D. TOKYOENSIS –Tokyo Wood Fern- This Asian fern is deciduous and said to be equivalent to an upright grass. The narrow foliage will get to 3' tall. 1 gal. \$ 16.00

D. WALLICHIANA- Wallichs Wood Fern-In our garden, plants get 2'x2' and are deep green and vase shaped. One of our favorite ferns. Very beautiful. 1 gal. \$ 20.00

OSMUNDA

O. CINNAMOMEA - The cinnamon fern has a vase shape. The 2' fronds arch out to 18". The light green fronds don't have spores. The center fruiting stems get 2' tall and are cinnamon colored. This deciduous fern has beautiful yellow fall color. 1 gal. \$ 16.00

O. REGALIS - The royal fern is a wow! Our 15 year old plant is 8'x8' and has a 2' trunk almost like a tree fern. Every year this deciduous fern gets larger foliage as the plant gets larger. Can grow in really wet soil or well drained soil. 1 gal. \$ 16.00

POLYSTICHUM

P. ARCOSTICHOIDES- Christmas fern. Has bronze new growth in spring. This 1-2 ft. spreading evergreen does well in numerous climates. Sue Olsen in her superb book '*Garden Ferns*' says *P. arcostichoides* doesn't do well in the Northwest, but does well in colder or hotter climates. 1 gal. \$ 15.00

P. LUCTUOSUM- Frosted Rock Fern-Has evergreen foliage that can get 2' tall with broad foliage and rich deep green color. 1 gal. \$ 16.00

P. MUNITUM- Our native sword fern grows from Alaska to southern California. The plant is common in the woods, but is still a very handsome garden plant. The vase shaped plant will get 2'x2' and is evergreen, but best cut back in February. 1 gal. \$ 15.00

P. NEOLOBATUM - Asian Saber Fern- Is a hardy glossy evergreen fern. The narrow foliage is deep green and narrow. This plant is very tough and easy to grow in the woodland garden. 1 gal. \$ 15.00

P. POLYBLEPHARUM - The tassel fern has a pretty glossy deep green frond on a plant 12"-18" tall. The unfolding croziers are interesting to watch each spring. 1 gal. \$ 15.00

P. SETIFERUM- (Alaska Fern) - But is actually very British. The soft fronds are lacy and open showing the fine leaflets. Grow anywhere except brilliant sun. We have plants through our garden and always enjoy this elegant evergreen. 1 gal. \$ 15.00

P. SETIFERUM 'BEVIS' - This plant is so fabulous that fern experts say when you see it, buy it. You may not see *P. setiferum* 'Bevis' again. This lovely evergreen fern has thin fronds that are curved at the apex. 1 gal. \$ 18.00

P. SETIFERUM ROTUNDATUM 'CRISTATUM'- We did cuttings from our friend Diana's garden. The fronds will get 18" tall and will divide multiple times making a pretty evergreen. This plant has broader leaflets, so it's not like *P. set. divislobum*.. 1 gal. \$ 15.00

P. TSUS'-SIMENSE- Rock Fern- This Asian form of small size. Plants should get to 1' tall. The evergreen fronds are narrow and very graceful. 1 gal. \$ 16.00

WOODWARDIA

 **W. ORIENTALIS**- is a deep evergreen foliaged fern. from Asia. The plant will get to 18"x18" and has an attractive divided leaf. 1 gal. \$ 20.00

W.UNIGEMMATA- This fern has been hardy in our garden at 5 degrees but is said to be zone 8. The evergreen foliage appears in spring through summer and is rich rusty red. By fall the large tropical looking fronds will get 18" long. Spectacular plants. Will grow fast. 1 gal. \$ 16.00

FATSIA

F. JAPONICA- A remarkable plant for our gardens. *F. japonica* can be a house plant and our plant withstood -12 F. This woodland plant can take full deep shade to morning sun. The large evergreen maple looking leaves are attractive all year. 2 gal. \$ 24.00

FOTHERGILLA

F. GARDENII 'BLUE MIST' - We thought *F. 'Blue Shadow'* superseded *F. 'Blue Mist'*. *F. 'Blue Shadow'* appeared several years ago and most people stopped growing *F. 'Blue Mist'*. We, however, noticed that *F. 'Blue Mist'* is a much better blue foliage plant for shade. Our plants are 2'x3' and have lovely blue foliage all summer. 1 gal. \$ 32.00

 **F. GARDENII 'JANE PLATT'**- Our introduction from Mrs. Platt's garden. This small grower (18"x24") has white flowers in April. In late fall (November), the leaves turn amazing orange, red and yellow. 1 gal. \$ 38.00

F. GARDENII 'MT. AIRY' - This form of *fothergilla* was named by Michael Dirr who says it's the brightest fall foliage of all the *F. gardenii*. The plant should get 6-8' tall. From Mt. Airy Cemetery in Cincinnati. Has been hardy to -25°F. 1 gal. \$ 28.00

F. MAJOR- The first time we have had this fine shrub in several years. F. major is a 10-12' shrub with white paint brush flowers in April. All summer the foliage is dark green and is a wonderful backdrop for clematis. In fall, the foliage is stunning yellow orange and red. 1 gal. \$ 32.00

GARDENIA

G. 'FROST PROOF'- This double flowering gardenia covers itself with white fragrant flowers. Said to be hardier than G. 'Kleim's Hardy' and also grows larger. 1 gal. \$ 22.00

GARRYA

G. ELLIPTICA 'JAMES ROOF' - We've grown only the finest of our natives and this is one of the best. Garrya elliptica is a native from the Oregon coast south to Central California. The Saratoga Horticultural Foundation named this excellent cultivar for its tassels that are up to 12" long. The evergreen foliage is wavy and rustles in the wind. Garrya 'James Roof' climaxes its season in February-March when the tassels hang like icicles. 1 gal. \$ 32.00

GERANIUM

 **G. 'BLUE SUNRISE'**- Has lavender purple flowers May-June. The difference is that the foliage is golden and will get 18-24" across. 1 gal. \$ 18.00

G. 'ROZANNIE'- Probably the best geranium of all. This plant blooms from May-late October (when frozen). The deep green foliage will get 18x2" and is covered for months with glowing light purple flowers with white centers. 1 gal. \$ 16.00

GINKGO

G. 'JAGGED JADE' - Has pretty sculpted deep green leaves. The leaves have a distinctive jagged edge. Found and named by Crispin Silva. 1 gal. \$ 40.00

G. 'MAJESTIC BUTTERFLY'- is an upright grower from Talon Buchholz. The foliage has varying degrees of variegation. In 10 years, it will get to 6' tall. 1 gal. \$ 50.00

G. 'MARIKEN'- Is a small growing ginkgo that will get 4'X4' in many years. The growth is only 2"-3" per year. A great container plant. Also, for the smaller garden. 2 gal. \$ 50.00

G. 'MUNCHKIN'- is a small grower to maybe 3-4' tall in many years. This tight small grower is wonderful for container or garden planting. 1 gal. \$ 50.00

G. PEVE MARIBO'- This new plant comes from Vergeldt Nursery in Holland. The variegated small foliage is dark green with yellow streaks. Makes a dwarf flat topped plant in time. 1 gal. \$ 90.00

 **G. 'SUNSTREAM'**- is said to be an upright ginkgo. The variegated foliage is deep green and yellow in spring. By summer, the yellow will change to cream. Doesn't revert like some of the variegated ginkgos. 1 gal. \$ 55.00

G. 'TROLL'-is very small ginkgo with closely packed leaves and heavy branches. One of the smallest ginkgos. Dark green foliage all summer and great yellow fall color. 1 gal. \$ 48.00

GLADIOLUS

G. 'BOONE' -One of our favorite bulbs. We received our original plant from Holbrook Farm Nursery 20+ years ago. The 18" upright glad will have yellow flowers with orange peach centers. G. 'Boone' stays upright without staking. Our plants have withstood 0° F. on occasion. 1 gal. \$ 15.00

GUNNERA

G. PERPENZA - We got our plant from Heronswood back in the 90's. Our plant is now a thicket 6' across. The foliage is oval and has curvy margins. We mulch with leaves in winter and grow with plants of Fuschia megellanica 1 gal. \$ 18.00

HAKONECHLOA

H. MACRA 'ALL GOLD' - The typical Japanese forest grass is a green plant 12" tall. We have had several variegated forms for years including the fabulous H. macra 'Aureola'. Now comes this beautiful all gold form. The plant still gets 12" tall, but has fully golden narrow grassy leaves. An excellent addition to the woodland garden. 1 gal. \$ 12.00

H. MACRA 'AUREOLA' - This popular grass is one of our best woodland plants. The dark green leaves have broad yellow stripes going vertically. The overall effect is of a golden arching grass. Great for containers in the spring-fall. 1 gal. \$ 12.00

H. 'SUNNY DELIGHT' - Said to be a reverse of H. macra 'Aureola'. There is more green than yellow. The green and yellow strips are much more subtle than H. m. aureola. A great woodland companion with ferns, rodgersia, etc. 1 gal. \$ 12.00

gosslerfarms.com
541-746-3922

HAMAMELIS - All hamamelis listed are hardy to at least - 12° here, and all are grafted plants. These are alphabetized by name, with: "i" = intermedia, "j"= japonica, "m"= mollis, "v" = vernalis

H. i. 'ANGELLY' - Is the absolutely latest to bloom. Last year it stopped flowering just before our magnolias started. The heavy blooming plant has golden flowers even on young plants. It was discovered and named in 1985, by J.H.H. Van Heijningen in Holland. 1 gal. \$ 40.00

H. i. 'ALLGOLD' - Deep yellow flowers with red calyx. Many flowers on an upright shrub. 2 gal. \$ 50.00

H. i. 'AMMON' - This Dutch hybrid has bright yellow flowers similar to H. 'Pallida'. Not as fragrant as H. 'Pallida'. But, said to be an improvement. 1 gal. \$ 46.00

H. v. 'AMETHYST' - Has a bright purple flower in January-February. This plant has a much richer fall color than H. vernalis 'Purpurea'. Best with light behind the plant to highlight the flowers. 1 gal. \$ 46.00

H. i. 'ARNOLD PROMISE' - Bright yellow flowering blooms profusely. For year round color this is one of the best. In January - February the yellow flowers appear. During spring-summer, the foliage is dark green. In fall the leaves turn brilliant yellow, orange and red.

1 gal. \$ 42.00

H. v. 'BLUE MOON' - The parent plant was discovered by Jorg Kohout in Germany. This violet purple selection of *H. vernalis* is a very rich glowing purple.

1 gal. \$42.00

H. 'BONNYBROOK' - From the Bonnybrook Nursery in Kirkland, Washington. We don't know when the nursery was in business (long ago, we assume). This golden flowering form of *Hamamelis intermedia* is nicely fragrant. Our plant came from Brian Mulligan who lived in Kirkland.

1 gal. \$ 48.00

H. 'BOSKOOP' As you can tell named in Boskoop, Holland. This intense golden yellow witch hazel has a heavy bloom in January-February. Said to have larger leaves than other witch hazels.

1 gal. \$ 48.00

H. i. 'BRANDIS' - Introduced in 1985 by Helmers Nursery and named for the house in which Heinrich Bruns lived. Flowers are golden yellow and purple at the base. No scent but lovely yellow flowers.

3 gal. \$ 50.00

H. v. 'CHRISTMAS CHEER' - Has small orange yellow flowers around Christmas time.

1 gal. \$ 42.00

H. i. 'CARMINE RED' - This medium reddish pink hamamelis forms a large shrub 15-18' tall. The fall foliage is beautiful golden yellow.

1 gal. \$ 40.00

H. 'DANNY' - Has vibrant red flowers in January. Said to be *H. intermedia* x *H. vernalis*. This plant will be covered with red flowers for an extended period in winter.

1 gal. \$ 50.00

H. i. 'DIANE' - Has glowing red flowers in January-February. The fragrant flowers are borne all over the stems. The fall color is among the finest of any with its glowing red-purple leaves.

1 gal. \$ 42.00

H. i. 'DISHI' - One of the Debelder hybrids with great scent. The flowers are yellow orange. Fall color is orange red. Worth growing for the scent and fall foliage color.

1 gal. \$ 38.00

H. i. 'FIRE CHARM' - (Feuerzauber) has soft red flowers. This hamamelis looks somewhat like *H. 'Ruby Glow'* but has a round leaf and lighter colored flowers. Nice red-orange fall foliage color.

1 gal. \$ 38.00

H. I. 'GINGERBREAD' - Has deep orange flowers with purple bases. Very rich coloring of the flowers are followed by purple new growth. The fall foliage is golden yellow.

1 gal. \$ 50.00

H. i. 'GLOWING EMBERS' - Was discovered by Wada at Hakoneya Nursery, Japan. The flowers are golden yellow at the tip of the flower and deep red at the base. The overall effect is orange-coppery in late winter.

1 gal. \$ 45.00

H. i. 'HEINRICH BRUNS' - Is bright orange in January. The deep red base of the flowers makes the orange even more striking. No fragrance to the flowers.

1 gal. \$ 45.00

H. i. 'HILTINGBURY' - Has reddish flower color in January. The fall color is rich, glowing red. Said to be one of the best *H. intermedia* cultivars for the fall color.

1 gal. \$ 45.00

H. i. 'JELENA' - Our big plant has bloomed off and on all summer for the last several years and just kept blooming most of the winter. The flowers are coppery-orange. This is one of the best of all hamamelis.

1 gal. \$ 40.00

H. v. 'LITTLE SUZY' - A small 6' upright shrub that has yellow flowers that are very fragrant but small. This is an interesting witch hazel for a small space.

1 gal. \$ 40.00

H. v. 'LOMBART'S WEEPING' - It is so unusual it's almost never offered in catalogs. This plant is so strongly weeping it doesn't form a shrub but more like a mound. Grow on a mound or over a rock wall so it can spill over. The flowers are sweetly scented in winter.

1 gal. \$ 40.00

H. i. 'LUNA' - Has some of the lightest colored flowers of any hamamelis. Our plants produce very light yellow flowers in mid January.

2 gal. \$ 40.00

H. v. 'MEXICANA' - This Mexican native blooms in October with many small light yellow flowers. Many times the foliage is still on the plant. The fragrance carries for yards.

2 gal. \$ 45.00

H. MOLLIS - The species is always wonderful with its golden yellow flowers each spring.

1 gal. \$ 45.00

H. i. 'MOONLIGHT' - Has soft yellow flowers in January. The flowers are among the lightest of any of hamamelis.

2 gal. \$ 45.00

H. v. 'ORANGE SUNRISE' - This smaller grower (10') will be covered with small orange flowers in early spring.

1 gal. \$ 42.00

H. i. 'PALLIDA' - We have grown this for 40 years. Still one of the standards of the witch hazels. We see this plant in retail nurseries occasionally. The brilliant yellow flowers cover the plant in January-February.

1 gal. \$ 40.00

H. i. 'PARASOL' - is a fun plant as the tips of the branches weep. The flowers are light yellow in January. This is one of the more unusual hamamelis cultivars.

1 gal. \$ 40.00

H. i. 'PRIMAVERA' - Broad, light yellow petals on this variety from Belgium. Heavy flowering. One of the very best hamamelis.

1 gal. \$ 40.00

H. v. 'PURPUREA' - The typical *H. vernalis* has yellow flowers and yellow fall foliage. This variety has bright purple flowers. The shrub is worth growing for the flowers let alone the rich purple fall color.

2 gal. \$ 45.00

H. v. 'QUASIMODO' - Our plant is 6'-7' tall after 15 years. Our original plant came from Peter Zwjnenburg, Boskoop Holland its originator. This small hamamelis has a lovely spicy fragrance in winter.

2 gal. \$ 48.00

H. v. 'RED IMP' - Named by Peter Dummer and Roy Lancaster at Hilliers Nursery, England in 1996. This plant has red crimped and twisted flowers in midwinter.

1 gal. \$ 42.00

H. i. 'ROCHESTER'- Wow! What fragrance! H. 'Rochester' has small orange-yellow flowers in January. The flowers aren't very exciting but the fragrance is probably the best of any hamamelis we've sniffed. 1 gal. \$ 42.00

H. i. 'RUBIN' - The deep red flowers cover the plant in January-February. After comparing with H. Diane, this is a brighter red that holds its color longer.

1 gal. \$ 42.00

H. i. 'RUBY GLOW'- Medium red flowers with very bright red fall foliage color. 1 gal. \$ 40.00

H. v. 'SANDRA' - One of our favorite fall coloring shrubs. H.v. 'Sandra' has purple new growth in spring and early summer. In the fall, the foliage turns glowing red and will have color for three weeks. We understand that there isn't a fall color on H. 'Sandra' in the southeast. But in our part of the country it is superb. 1 gal. \$ 42.00

H. i. 'SPANISH SPIDER' - This Kalmthout hybrid has long spidery flowers that are strawberry-yellow bi-color. The flowers are an attractive color, but have very little scent. We only have a few available. 1 gal. \$ 42.00

H. i. 'SUNBURST' - Has the brightest yellow flowers of any hamamelis yet. The brilliant flowers are borne in heavy clusters. Like H. 'Primavera' but much brighter yellow flowers. H. 'Arnold Promise' is a very nice plant, but is positively dull when compared to H. 'Sunburst'.

1 gal. \$ 40.00

H. m. 'SUPERBA' - Our plant is in hot sun all afternoon and is thriving. The golden yellow flowers cover the plant in January. The plant is very fragrant when in bloom.

1 gal. \$ 45.00

H. i. 'WESTERSTEDE'- Has medium golden yellow flowers in January. The fall foliage is a nice yellow. An older hybrid, but still a good plant. 2 gal. \$ 42.00

H. m. 'WISLEY SUPREME' - Several experts have commented what a superior clone this is. The bright golden flowers are large and heavily clustered on the stems.

1 gal. \$ 42.00

H. j. 'ZUCCARINIANA' - Flowers are light yellow and have very twisted petals in February in our garden.

2 gal. \$ 40.00

HELLEBORUS WINTER JEWELS ®

These come from Northwest Garden Nursery, Eugene, OR. Marietta and Ernie O'Byrne have the most exiting hybrids of any we've seen. All of these hybrids are vibrant colors and it's exciting to see what new seedlings produce each spring. Northwest Garden Nursery doesn't ship their hybrids and they are only open 2 weekends per year, so it's your chance to get some of these beautiful perennials from our catalog. Please see their web site for pictures.

(www.northwestgardennursery.com). All the named hellebores come directly as plants from Ernie and Marietta. It's really difficult to sell any of these gorgeous plants; they are so beautiful, we want to keep all of them.

H. 'AMETHYST GEM' - Rich purple double flowers with light lavender margins. 1 gal. \$20.00

H. 'AMETHYST GLOW' - Deep dark purple petals with lighter lavender margins. This was the most exciting hellebore last spring in the nursery, 1 gal. \$ 20.00

H. 'APRICOT BLUSH' - Has soft yellow pink flowers that are just as pretty on the outside of the flowers as the inside. 1 gal. \$ 20.00

H. 'BERRY SWIRL' - Pinky purple flowers that are beautiful doubles. 1 gal. \$ 20.00

H. 'BLACK DIAMOND' - This lovely deep black purple flowers in spring. These single hellebores are superb with cyclamen coum, galianthus, etc. 1 gal. \$ 20.00

H. 'BLUE DIAMOND'- Has deep blue -black flowers in January-March. The single flowers are quite striking. 1 gal. \$ 20.00

H. 'CHERRY BLOSSOM' - Has single rich pink flowers that have lovely centers, like extra tiny petals.

1 gal. \$ 20.00

 **H. 'COTTON CANDY'**- Has the most beautiful soft pink double flowers. This new (to us) hellebore has glorious color and form. 1 gal. \$ 20.00

 **H. 'DOUBLE PAINTED'**- Has white petals with great amounts of purple spots in the center of the flower. The double flowers are really striking in February and March.

1 gal. \$ 22.00

H. 'DOUBLE SLATE' - This is the darkest black blue of the O'Byrne's hellebore hybrids. The flowers are double and create quite a display. 1 gal. \$ 20.00

H. 'FIRE AND ICE'- is a double white with rich red margins. When people see the plant they can't help but buy it. 1 gal. \$ 22.00

H. 'GOLDEN LOTUS'- Are wonderful deep golden yellow double hellebores that will mostly be unspotted.

1 gal. \$ 20.00

H. 'GOLDEN SUNRISE' - Single golden yellow flowers. Some of the plants will have purple spots or streaks.

1 gal. \$ 20.00

H. 'ONYX ODYSSEY' - Very deep dark purples to black. Flowers are full double. WOW!

1 gal. \$ 20.00

H. 'PEPPERMINT ICE' - This has single white to pink flowers with a pink rim around the petals. 1 gal. \$ 20.00

H. 'PICOTEE PEARL'- Is a white single with a center ruff of petals. Most of the center petals have a pink margin.

1 gal. \$ 20.00

H. 'RED SAPPHIRE'- Has rich red double flowers. The colors are bright and lovely in February-April.

1 gal. \$ 20.00

H. 'ROSE QUARTZ'- Is a double white with rich pink margins on all the flowers. 1 gal. \$ 20.00

H. 'RUBY WINE' - Very rich ruby pink purple single flowers on lovely evergreen plants. 1 gal. \$ 20.00

H. 'SPARKLING DIAMOND' - This double hellebore is snow white. We have seen double H. niger, but this is a much more garden worthy plant. 1 gal. \$ 20.00

H. 'SUNFLARE'- Glorious!! We saw H. 'Sunflare' for the first time when Ernie and Marietta asked us to send several plants to photograph. The yellow double flowers have a beautiful red margin on the edge of the flowers. I don't know how many we will sell, but I think we will plant many in our own garden! 1 gal. \$ 22.00

H. 'WHITE PEARL'- Has either snow white single flowers or some purple around the stamens. Some plants have petloids in the center. 1 gal. \$ 20.00

HELLEBORUS HYBRIDIS - These are mixed seedling plants. Flowers can be purple, pink, white, and some yellow. We don't color sort so we just pick the best plants and if you order several you will get a range of colors when in bloom. 1 gal. \$ 16.00

 **H. BALLARDIAE 'PINK FROST'**- has showy deep green foliage year round. In spring, this hybrid is covered with a huge number of pink flowers. Only a few available. 1 gal. \$ 22.00

H. 'PACIFIC FROST'- This form of H. argulifolius has dramatic large jagged foliage with creamy spots over the leaves. The flowers are greenish and rise above the foliage in early spring. 1 gal. \$ 16.00

 **H. STERNII VARIEGATED**- We received these plants from Ernie and Marietta (see Helleborus Winter Jewels). This form has pretty deep green leaves with nice splashed pink and white. Plants are small this fall but well rooted. 1 gal. \$ 17.00

HEMEROCALLIS

H. 'CORKY' -Looks like what a daylily should look like. The small golden flowers appear in July on 18" dark purple stems. Has a real grace about the plant. So different from modern hybrids. 1 gal. \$ 14.00

HYDRANGEA

H. 'ANNABELLE'- This fun large flowered hydrangea can be grown in different ways. It can be grown as a shrub up to 6' tall. The way we grow it as a perennial. We plant it and let the plant grow a year. In early spring, we cut the plant to 6". We will get huge white flowers. The plant will bloom in the current season growth, so you can get a real show- stopper each spring. 2 gal. \$ 22.00

H. 'CHINENSIS'- We found this lovely plant at Far Reaches Farm (Port Townsend, WA) The glossy foliage makes a great background for the large sterile flowers and fertile lace cap type flowers. 1 gal. \$ 25.00

H. MACROPHYLLA 'LANARTH WHITE' - Is a lace cap hydrangea with white sterile flowers and small blue fertile flowers. Our plant is 5-6' tall and in all day shade, where it really lightens up the area. 2 gal. \$ 25.00

H. PETIOLARIS 'MIRANDA' - This climbing hydrangea has small, dark green leaves that are widely margined with golden yellow. In the spring and early summer the plant has a golden glow to it. We have Guy Mitchum to thank for this fine vine for the shaded garden. 1 gal. \$ 22.00

H. PETIOLARIS 'PLATT'S DWARF' - We have talked to several knowledgeable experts and they say this fine plant is actually a climbing hydrangea. The original plant at Jane Platt's garden was a very small deciduous vine. 1 gal. \$ 22.00

H. SERRATA 'BENI GAKU' - Has lace cap flowers that are pink, white and red all on the same plant. Our largest plant is 3' tall and 2' wide. We grow our plant in semi-shade but we have also seen plants in full sun. 1 gal. \$ 22.00

H. 'PIA' - A cute dwarf mop head hydrangea with pink flowers. We have grown this small plant for years and it's so nice to have a hydrangea only get 18"x18". No freeze damage at 5-6 degrees. 1 gal. \$ 22.00

H. 'PISTACHIO' - New to us, but we liked this new hydrangea immediately. The low mop head has green and pink flowers in July. 2 gal. \$ 26.00

H. 'SNOW QUEEN'- Still one of the finest of the oak leaf hydrangeas. The large white flowers appear in July and eventually turn tan in fall. The fall foliage is purple, red and yellow. The bark peels in the large stems. 1 gal. \$ 24.00

 **H. 'WINTER GLOW'**- is an evergreen climbing hydrangea with glossy green leaves. Flowers are white lace cap in June-July. 1 gal. \$ 22.00

ILEX

I. 'DWARF PAGODA' - These plants are 4 years old and are about 3"-4" tall. We take cuttings off our 40+ year- old plant. The healthiest large cuttings must be ignored, as they will actually grow too large. These plants are not a moneymaker, but we enjoy them so much we continue to grow them. 1 gal. \$ 16.00

I. 'MARIESH' - Will get 10' tall. This is somewhat like a giant Dwarf Pagoda. These plants are 3 years old and 18" tall. 2 gal. \$ 20.00

I. 'ROCK GARDEN' - Is the smallest of any holly we have seen. This little plant grows perhaps 1/2" per year. Have seen 6" plants, 10 years old. The deep green holly leaves engulf the plant making a tight mound. The red fruit are very attractive all winter. 1 gal. \$ 16.00

I. CRENATA 'SKY PENCIL' - Everyone seems to be looking for vertical plants that are evergreen, but not coniferous. Our original plants are 8' tall by 1' wide. 1 gal. \$ 16.00

ILLICUM

I. FLORIDANUM- Florida anise shrub. Tough as nails, this native to the south has been unharmed at -12°F. The deep green leathery leaves look somewhat like kalmia. The maroon flowers are star shaped 1' across. Will grow in full sun or partial shade. 1 gal. \$ 20.00

ITEA

I. VIRGINICA 'SHIRLEY'S COMPACT'- This dwarf 12"x12" itea is an unusual plant from Biltmore House, NC. Don't know much about the plant, but probably a fun, small plant. 1 gal. \$ 20.00

JUNIPERUS

J. COMMUS 'COMPRESSA'- The dwarf columnar juniper can get to 10' in rich soil but in severe conditions will only get 2-3' x 8" wide. This hardy conifer will make a nice focal point in any garden, especially in the rock garden.

1 gal. \$ 25.00

J. HORIZONTALIS 'PANCAKE' - As the name says J. horizontalis is flat growing to 2-3' x 18" across. Wants full sun and good drainage to get the best blue green color.

1 gal. \$ 25.00

KALMIA LATIFOLIA

K. 'ELF'- Has small pointed leaves (1 1/2" x 1/2"). The plant will get 2' in time. The flowers are light pink and truly cover this dwarf shrub.

1 gal. \$ 20.00

K. 'RASPBERRY GLOW'- is one of the red budded Mt. Laurels. The deep red flowers open to dark pink flowers. Nice deep green foliage backs the pink flowers.

1 gal. \$ 20.00

K. 'WILLOW CREST' - We have had this narrow leafed Mt. Laurel for 25 years, but have tried cuttings at all times of the year with no luck. We gave scion wood to Steve McCullough to try tissue culture and he was very successful.

The narrow leaves are the main reason to grow this plant (the flowers are typically white in May).

1 gal. \$ 25.00

KERRIA

K. 'GOLDEN GUINEA'- We found this plant in the 1980's in Boskoop, Holland. The 2" single vibrant golden yellow flowers are striking. The plant will get to 6' on an open graceful plant.

1 gal. \$ 24.00

 **K. JAPONICA 'ALBIFLORA'**- came to us from J.C. Raulston as a care package many years ago. The creamy white flowers are single in early spring. This plant is an open shrub 3-4' tall.

1 gal. \$ 25.00

KIRINGSHOMA KOREANA

This beautiful perennial comes from Korea. This shade lover has light green leaves that are somewhat like maple leaves. In August, the plants will cover themselves with thickened yellow shuttlecock like flowers.

1 gal. \$ 18.00

KNIPHOFIA ROOPERI

VERY LIMITED! WOW! What a spectacular plant. We first saw K. rooperi in England in the fall of '99. This huge flowering kniphofia is truly spectacular. The flowers are 8"-10" long and are intense orange and yellow. The flowers will get 6" across.

1 gal. \$ 24.00

LESPEDEZA

 **L. 'GIBRALTER'**- Comes from Delaware. This semi woody plant dies back each winter. We cut the plant to 24" each February. The plant grows incredibly fast, so by August our plant is 8'x8'. In September, the plant is covered with small purple pea shaped flowers. The plant will positively weep with the weight of thousands of flowers.

1 gal. \$ 24.00

 **L. 'WHITE FOUNTAIN'**- We saw this lovely pea shrub at Chanticleer, Wayne, PA. Several plants were in the parking lot and made a stunning show in September. The arching stems literally cascade with the amount of white flowers. We don't get many flowers, but the deep green lush foliage is worth growing by its self.

1 gal. \$ 24.00

LEUCOTHOE

L. DAVISIAE - The sierra laurel is a tough 12" ground cover. The deep green foliage is heavily veined. So makes a pretty loose growing shrubby ground cover. Have seen L. davisiae in fairly dry, well drained soil. Our plants grow under Tsuga mertensiana with Cyclamen coum growing with the Leucothoe.

1 gal. \$ 18.00

L. KEISKEI - This pieris relative is a slow growing evergreen shrub. The small (2') shrub has bronze new growth and dark green waxy foliage on arching stems. The white flowers are typical of most leucothoe species.

1 gal. \$ 28.00

L. 'RAINBOW' - This 5'-6' shrub has 3" long leaves splashed with golden yellow and pink. The stems are deep purple red. Flowers are white racemes similar to Pieris japonica. Our plant grows in full sun, but probably best in the shade.

1 gal. \$ 25.00

L. 'SCARLETTA' - Has deep green leaves year round. The new foliage is rich maroon red. The white flowers appear in early spring on a 3'-4' shrub.

1 gal. \$ 24.00

LIQUIDAMBAR

 **L. 'S. SLENDER SILHOUTTE'**- Found by Don Shadow of Tennessee. We have seen plants 20'x2' wide. This very strong columnar sweet gum makes a nice focal point. No pruning needed to keep it narrow.

1 gal. \$ 48.00

LOMATIA

L. MYRACOIDES - This rarely grown evergreen shrub comes from Australia. The Grivellia relative should be tender but our plant has withstood 0°F. The narrow foliage has jagged margins. The white flowers show up in small clusters with a vanilla scent in July and August. Note: Do not use chemical fertilizer, the plant will turn black and die within days. We found out the hard way.

1 gal. \$ 25.00

LONICERA

L. 'BIRLONI' - Is a 12" arching evergreen shrub. The plant will cascade over a wall or rock garden. The small golden leaves are attractive all year. We haven't noticed any flowers, but the plant would make a small ground cover.

1 gal. \$ 16.00

L. 'FRAGRANTISSIMA'- The fragrant honeysuckle forms a large shrub (10'). The shrub has deep green foliage all summer. The deciduous shrub will have small white honeysuckle flowers. The fragrance is glorious and can be detected 100 ft. away. Will look like a vine as a young plant, but will make an upright shrub in time.

1 gal. \$ 19.00

L. NITIDA 'TWIGGY' - An 18" shrublet with tiny green to goldish foliage. One year old plants will only be 12" x 12". L. nitida 'Twiggy' looks like a very tiny version of L 'Baggesens Gold', but much smaller.

1 gal. \$ 16.00

 **L. 'PURPUSHII'**-(Winter Beauty) is a winter blooming honeysuckle. Our plants start sporadically blooming in December and continue until March. The white flowers are fairly small, but cover the bare (deciduous) stems. The flowers have a sweet fragrance. In summer grow a clematis throughout the dark green foliage.

1 gal. \$ 24.00

**OPEN: YEAR ROUND WEDNESDAY
THROUGH SATURDAY...9-5.....
OTHER DAYS CALL AHEAD.
Gossler Farms Nursery 541-746-3922**

MAGNOLIA

MAGNOLIA 'ADVANCE' – Burgundy X Vulcan—Has glowing purple pink flowers in late March. This fine plant comes from Vance Hooper in New Zealand. A fairly new plant to us. Our plant hasn't bloomed, but the pictures are lovely. 2 gal. \$ 90.00

MAGNOLIA 'APOLLO' – Has rich pink-purple flowers on a 30'tree. The tepals are somewhat pointed. M. Apollo will bloom as a very young plant and in time will cover itself with great amounts of flowers. 2 gal. \$ 90.00

MAGNOLIA 'BIONDII'- Is the first Magnolia to bloom. Usually in late February. The small white flowers seem to miss the frost many years. This is a mass effect bloom. The flowers are small, but appear by the hundreds. 1 gal. \$ 80.00

MAGNOLIA 'BLACK TULIP' - ('M Vulcan x M. 'Iolanthe') - One of the darkest of all magnolia hybrids. This Mark Jury hybrid from New Zealand will get 30-40" tall fairly quickly. The black-purple flowers are a tulip shape and appear in March. 2 gal. \$ 98.00

MAGNOLIA 'BLUSHING BELLE' - (M. 'Caerhays Belle' x M. 'Yellow Bird'). Looks similar to M 'Caerhays Belle,' but is much hardier and narrow growing. This superb plant from Dennis Ledvina, Green Bay, WI, is a step forward for more northerly growers. 2 gal. \$ 95.00

MAGNOLIA 'BURNCOOSE' – We got our original scion wood from Dr. Corbin's garden in Portland. This large growing hybrid is very vigorous. The flowers are 10-12" across and the richest pink purple. The color is truly striking in March. 2 gal. \$110.00

MAGNOLIA 'BUTTERFLIES'- is a Phil Savage hybrid so its got to be wonderful. Phil would only name his very best magnolias. If they had problems, they were eliminated. M. 'Butterflies' has small (3-4") rich golden flowers covering the bare branches in March. 2 gal. \$ 85.00

gosslerfarms.com
541-746-3922

MAGNOLIA 'CAERHAYS BELLE'- After 40 years of growing this glorious tree, it's still one of our favorites. The 24" plants will be 10-12' in 3 or 4 years and will bloom as a 3 to 4 year old plant with amazing pink flowers 10"-12" across. The plant will be covered with the large flowers. 2 gal. \$115.00

MAGNOLIA 'CAERHAYS NEW PURPLE' - The flowers are similar to M 'Caerhay's Belle', but are deep glowing purple pink. Rarely offered in this country. 1 gal. \$ 90.00

MAGNOLIA CAMPBELLI 'LANARTH' – Maybe the most stunning of any magnolia we grow. Actually, it is the most stunning. Our plant is 30' tall and this spring had 30-40 flowers. Not many flowers, but the color and form are worth it. The flowers are cup and saucer shaped and are glowing pink-purple. The buds are huge before the flowers open and are attractive for weeks. 1 gal. \$ 110.00

MAGNOLIA 'CORAL REEF'- Is one of Dennis Ledvina's wonderful hardy hybrids. This pink magnolia has a lovely peach tint to the tepals. Should be hardy to -20°F. 1 gal. \$ 85.00

MAGNOLIA DAWSONIANA 'CLARKE' – Our own selection of M. dawsoniana We got our plant from the Clarke Nursery in San Jose, California in the late 50's. This is by far the best of the M. dawsoniana cultivars as it has thousands of lovely, pink 6" flowers that look somewhat like orchids. 2 gal. \$ 90.00

MAGNOLIA 'DAYBREAK' - M. 'Woodsman' x 'Tina Durio'- One of August Kehr's best hybrids. It's wild to think that M. 'Woodsman' with its purple green and yellowish color could produce this lovely deep pink hybrid. This quick grower will grow well in many parts of the country. 2 gal. \$ 90.00

MAGNOLIA 'ELIZABETH' - We are still amazed at the sales of this yellow magnolia. We have sold M. 'Elizabeth' for 30+ years. This is still one of the finest of any yellow magnolia. 1 gal. \$ 65.00

MAGNOLIA 'FELIX' (M. FELIX JURY)- We first saw this incredible magnolia at Sebright and Ray Shriener's Salem, OR gardens. This plant has large rich glowing pink flowers that have somewhat wavy flowers. Our neighbor's plant is only 5' tall and has 5 buds for next spring, so blooms very young. 1 gal. \$ 120.00

MAGNOLIA 'FLAMINGO' – M. acuminata 'Fertile Myrtle' x M. sprengeri 'Diva'—This Phil Savage hybrid is a hardy peachy pink flowering Magnolia. Very hardy and a vigorous grower. If Phil named a magnolia it had to be superior as he didn't name very many. 2 gal. \$ 80.00

MAGNOLIA 'FORREST PINK' – Originally, M. denudata 'Forrest Pink'. This hardy magnolia has flowers that look like M. denudata but are a rich pink. Seems to withstand frost when in bloom. 2 gal. \$ 75.00

 **MAGNOLIA 'FRANK'S MASTERPIECE'**- This Frank Gaylon hybrid has very dark red purple flowers 8" across. The deep flower color outside the tepals is contrasted with the rich pink inside the tepals. Only 10 available. 2 gal. \$ 100.00

MAGNOLIA 'FULL ECLIPSE' - Is an upright grower for the smaller garden. The flowers are soft pink with white inside the tepals. 2 gal. \$ 80.00

MAGNOLIA 'GALAXY' - This superb National Arboretum hybrid is a rough, tough plant. It will take heavy clay, grow in parking strips and dry areas once established. Our mature (25 year) plant is 25-30' tall. The purple flowers over the plant in late March. Very adaptable from Southern California to Michigan. 1 gal. \$ 60.00

MAGNOLIA 'GENIE' – PPAF - A dwarf 10-12' tree. Everyone always asks for a “dwarf” magnolia with tulip shaped flowers. This New Zealand hybrid will have dark purple flowers in spring followed by lighter purple sporadic flowers in summer
 2 gal. \$ 92.00
 1 gal. \$ 20.00

MAGNOLIA 'GOLDEN RAIN' - This Dennis Ledvina hybrid has arching yellow flowers. They are not fully pendant, but attractively arching. M. acuminate x Norman Gould has pretty purple new foliage.
 2 gal. \$ 80.00

 **MAGNOLIA GRAND. 'BRACKENS BROWN BEAUTY'**- is a smaller growing m. grandiflora that is much hardier than M. g. 'Little Gem'. We have given up on growing M. 'Little Gem' as it continues to grow into fall. Then gets frozen. M. g 'Brackens Brown Beauty stops growing in fall. So, seems much hardier. The small leaves will have dark indumentum on a small tree.
 1 gal. \$ 48.00

MAGNOLIA 'GRETEL EISENHUT'- Looks like M. 'Caerhays Belle' but the flowers are even richer pink. This upright grower came to us in a shipment from Eisenhut Nursery in Switzerland.
 21 gal. \$ 85.00

MAGNOLIA 'HEAVEN SCENT' (M. liliflora 'Nigra' x veitchii). One of Todd Gresham earliest named hybrids. The lovely light purple flowers appear in late March. Has been hardy to -10°.
 2 gal. \$ 80.00

MAGNOLIA 'HONEY TULIP'- This New Zealand hybrid has large tulip shaped flowers that are glowing yellow. We saw pictures and instantly wanted to own this plant.
 2 gal. \$ 100.00

MAGNOLIA 'IOLANTHE' – One of the first of the New Zealand hybrid magnolias. M. 'Iolanthe' is a campbellii hybrid, but it will bloom at 2-3' tall. The white flowers have a pink blush to them in March. Will grow 2-3 feet per year when young.
 1 gal. \$ 70.00

MAGNOLIA 'IVORY JEWELL'- M. 'Woodsman' x M. 'Big Dude'—Another of Dennis Ledvina's beautiful magnolias. The white flowers are large and handsomely formed. The flowers are white with a slight pink blush.
 1 gal. \$ 90.00

 **MAGNOLIA 'JUDY'**- This 15-18' shrubby small tree will cover itself with mid purple 4-5" flowers in March. Very hardy and can grow in small gardens.
 1 gal. \$ 40.00

MAGNOLIA 'JUDY ZUK'- Is a Brooklyn Botanical Garden hybrid. The flowers are yellow and have a purple base to the tepals. When we had this plant two years ago they sold out quickly. So order early.
 2 gal. \$ 80.00

MAGNOLIA 'LILIFLORA O'NEILL' – We have a small number of this plant again. Our original plant came from Joe McDaniel back in '72. The plant is now 12x12' and blooms for months. The main bloom of deep purple flowers is in April with a scattering of flowers through the summer. Very hardy with deep green foliage and the pretty deep purple flowers.
 1 gal. \$ 60.00

MAGNOLIA LOEBNERI 'MERRILL' (M. loebneri 'Dr. Merrill') – Came from the Arnold Arboretum decades ago. We even had this plant in our catalog 50 years ago. Doesn't seem to be in the nursery trade anymore. The tree is an upright grower to 25'-30' with white flowers that are broad for a M. loebneri variety.
 2 gal. \$ 50.00

MAGNOLIA LOEBNERI 'SPRING SNOW' - Is a Joe McDaniel selection. The flowers look like a large M. stellata and are sparkling white. The hundreds of flowers cover our 20' tree each March.
 2 gal. \$ 60.00

MAGNOLIA 'MACROPHYLLA' - The largest leafed American tree. We have had 3' leaves on young plants. This is a big (50') tree of great presence. M. 'Macrophylla' will not be ignored in any garden. Our original plant wasn't hurt by 12 F. The flowers are 12-15" across in early summer.
 1 gal. \$ 35.00

MAGNOLIA 'MANCHU FAN'- This Gresham hybrid has large white flowers. The tepals are broad with a light purple blush.
 2 gal. \$ 70.00

 **MAGNOLIA 'MAUDIAE'**- Perhaps the hardiest of the spring blooming evergreen magnolias (used to be 'Michelia') Twenty foot plus plants are on northeast Fremont St. in Portland, OR and has been hardy for many years. The leaves are mid green with a grayish color under the leaves. The flowers are 2-3" across and are creamy white in March-April. Limited numbers available.
 1 gal. \$ 60.00

MAGNOLIA 'MARJORY GOSSLER'- M. sargentiana 'Blood Moon' x denudata). We sent pollen to Phil Savage and he sent back scion-wood. This plant makes a large 40' tree. the flowers have a pink blush to begin, but quickly turn white. Very hardy even in Detroit. It was a great honor that Phil named it for Marj.
 2 gal. \$ 90.00

 **MAGNOLIA 'ORCHID'**- Very similar to the Kosar Devos hybrids in size and flower. The large shrub (12' after 40 years) has painted tepals that are mid purple in late March-April.
 1 gal. \$ 50.00

MAGNOLIA 'PALLASIDE PINK'- From Pallaside, CO. which is 4700' elevation. It is said to bloom consistently at that elevation in the Rockies. The flowers are pink-purple and seems to be very hardy.
 2 gal. \$ 65.00

MAGNOLIA 'PAUL COOK' Many years this hybrid is one of the finest of all magnolias in our garden. The 10-12" flowers are a soft pink and even though there aren't as many flowers on the plant as other hybrids, they are very beautiful.
 2 gal. \$ 80.00

MAGNOLIA 'PEPPERMINT STICK'- This Gresham hybrid of M liliflora 'Nigra' x M. veitchii has white flowers with a rich pink flush to the base of the tepals.
 1 gal. \$ 70.00

MAGNOLIA 'PIET VAN VEEN'- Is a M. campbellii hybrid that blooms young. Our plant had multiple flowers after 4-5 years. The flowers are a rich light pink. Our plant was damaged by 0°F. But, came back strong.
 1 gal. \$ 75.00

 **MAGNOLIA 'PINKIE'**- is the lightest colored magnolia of the Kosar Devos hybrids. The tree (large shrub) is also the largest of the group. The soft lavender pink flowers cover the plants in March-April.
 1 gal. \$ 45.00

MAGNOLIA 'PRISTINE'- M. denudata x M. stellata 'Waterlily'. This Joe McDaniel hybrid grows in front of Roger's house. Probably the oldest tree anywhere and is 30'x20'. The creamy white flowers have multi tepals and cover the beautiful tree in March. 1 gal. \$ 75.00

MAGNOLIA 'PURPLE PRINCE' - This plant is an irregular growing to 20'+ plant. The rich purple flowers appear in late March-April. We still have flowers in July-August. 1 gal. \$ 80.00

 **MAGNOLIA 'RANDI'**- This Kosar Devos hybrid is the smallest of the group. our original 45 year old plant is 10-12-tall. The flowers are also smaller and are rich purple. A good plant for the small garden. 1 gal. \$ 45.00

MAGNOLIA 'RED BARON'- (M. acuminata 'Big Dude') This Denis Ledvina hybrid has large deep pink flowers in March. Very hardy. 2 gal. \$ 85.00

MAGNOLIA 'ROYAL CROWN' - One of Gresham's original selections. We have grown this plant since the early 70's. M. 'Royal Crown' has been hardy to 0 degrees several times with no damage. The four center tepals stand upright and the other four tepals drop down making a crown. The inner tepals are white and the outer part is a rich purple. 1 gal. \$ 70.00

MAGNOLIA SALICIFOLIA 'ELSIE FRYE'- Our original plant is 20+' tall after 40 years. This upright grower has small dark green leaves. The white 3-4" flowers are each beautiful in their own right. The pointed tepals and pink rimmed stamens are pretty. The plant is also a mass display each March. 2 gal. \$ 75.00

gosslerfarms.com
541-746-3922

MAGNOLIA SALICIFOLIA 'IUFER'-Very similar to M. sal. 'Elsie Frye'. The big difference is the stamens are showier. Came to us through Ernie Iufer (Ufer). A lovely tree for the smaller garden. 2 gal. \$ 75.00

MAGNOLIA SARGENTIANA 'BLOOD MOON'- Named for an opera, this form was growing in Strybing Arboretum(San Francisco Botanical Garden). The flowers are A rich, clear pink and are 8-10' across. A very beautiful Magnolia. 2 gal. \$ 95.00

MAGNOLIA SARGENTIANA ROBUSTA 'JANE PLATT' - We received our original plant from Jane Platt in about 1970. This glorious huge pink flowering magnolia seems a little bit hardier than M. campbellii. One spring our tree was amazing because the 30' plant had about 200 lovely light pink blooms. 2 gal. \$ 90.00

MAGNOLIA 'SAYONARA'- (M. soul. 'Lennei Alba' x M. veitchii). Blooms in late March with white flowers with very slight pink flush on the tepals. 2 gal. \$ 75.00

MAGNOLIA 'SERENE'- Our upright tree is now 25'x15' and has rich purple flowers in late March. Fast growing with lots of flowers. 1 gal. \$ 75.00

MAGNOLIA SIEBOLDII - Our most recommended magnolia, especially for the small garden. This excellent large shrub-small tree flowers late April - August 1. The flowers are ivory white with red stamens. The pendant flowers are followed by brilliant pink seedpods like little lanterns. Overall, one of the most beautiful plants we grow. 1 gal. \$ 45.00

MAGNOLIA 'SINENSIS'- We have not had M. Sinensis in ages. this small grower looks like sieboldii but blooms in a more concentrated season than M. Sieboldii. We got our original plant from Ernie Iufer in the early 60's. 2 gal. \$75.00

MAGNOLIA SOULANGEANA

MAGNOLIA 'DEEP PURPLE DREAM'- a (M. soulangeana 'Lennei' seedling) from Tom Dodd's nursery in Chunchula, AL. Said to be one of the darkest magnolia flowers. The inside of the tepals are pinkish. 1 gal. \$ 85.00

MAGNOLIA 'LENNEI'- Is a very old hybrid from Italy. One of the earliest hybrid magnolias. The 6" flowers are dark purple and are bowl shaped. Still an attractive plant after all these years. 1 gal. \$ 60.00

MAGNOLIA 'PURPLEANA' - We have had this plant since the 1960's. We found our plant in Portland. It's a slow upright grower to about 12'. The small soulangiana flowers are light purple by the hundreds. 1 gal. \$ 65.00

MAGNOLIA 'SAN JOSE' - We had this lovely saucer magnolia on our catalog cover years ago and were too good at selling it as we sold every plant. Dumb, I had to go buy a large plant in Seattle. The flowers are huge white with a strong pink outside the tepals. M. 'San Jose' was named by the Clarke Nursery in San Jose, California. 2 gal. \$ 75.00

GOSSLER FARMS NURSERY

1200 WEAVER ROAD

SPRINGFIELD, OR 97478 541-746-3922

MAGNOLIA 'SPECTRUM'- This National Arboretum hybrid is a large grower. Our tree is 40'x30' after 40 years. The flowers are very rich purple and are similar to M. 'Galaxy'(sister seedling). 2 gal. \$ 80.00

MAGNOLOIA SPRENGERI 'DIVA'- We have a supply again. We have grown this beautiful magnolia since the 60's. Our original tree is 50' and has a 24" caliper trunk. The flowers are true pink in early March. Has been hardy to -12° here. 2 gal. \$ 90.00

MAGNOLIA 'SUNSET SWIRL'- Has extra tepals and is a swirl of peachy pink. This Ledvina bybrid of M 'Daybreak' x M. 'Pink Royalty' is hardy to at least zone 5. 2 gal. \$ 68.00

MAGNOLIA 'SUSAN' - The best of the Kosar-DeVos hybrids! We have grown this group since the early 70's. The rich purple flowers cover the plant for at least a month in April. This is a hardy plant that stays small (12'-14') and has pretty flowers. What more can a gardener ask? 1 gal. \$ 50.00

MAGNOLIA 'TINA DURIO'- This Gresham hybrid starts blooming when young. But, the flowers are small (4"). When mature, the flowers are 8" and have large white tepals.

2 gal. \$ 90.00

MAGNOLIA STELLATA-

M. 'CHRYSANTHUMFLORA'- Similar to M. s 'Jane Platt' but flowers are smaller and a lighter color than M. s 'Jane Platt'. We haven't offered it before and don't have a large supply.

1 gal. \$ 80.00

M. ROSEA 'JANE PLATT'- One of the finest plants we ever found. We named this glorious plant for our friend and mentor back in the 80's. This star magnolia can have 60 tepals that are a pretty light pink. We are thrilled that M. 'Jane Platt' received an Award of Garden Merit from the Royal Horticultural Society. Only a few plants available so order early.

1 gal. \$ 65.00

5-6' 10 GAL NURSERY ONLY \$ 140.00

MAGNOLIA 'WATERLILY'- This M. stellata cultivar has double the number of tepals that the species has. The white flowers have a pink flush when they open. The plant will get 15-20' and have a huge mass of flowers.

1 gal. \$ 40.00

MAGNOLIA 'THOMPSONIANA'- The first named magnolia hybrid is a cross of M. virginiana and M. tripetala. Our original plant is 25' tall and was planted in the 50's. The lemon scented flowers appear in May-July.

2 gal. \$ 60.00

MAGNOLIA VIRGINIANA 'GREEN SHADOW'- Comes from seedlings from Joe McDaniel sent to Don Shadow from Tennessee. This great evergreen tree will get 25'x15'.

We sell many plants of M. virginiana in the Willamette Valley because of the wet soils. M. virginiana does very well in wet areas. The white flowers are 2" across and appear most of our summer.

1 gal. \$ 60.00

MAGNOLIA 'VULCAN' - An incredible glowing red-purple. The first blooms will be an odd purple and we worried it wasn't the correct plant, but it changed drastically with age. Hardy to probably 0° F. The flowers can be up to 12" across in March.

2 gal. \$ 70.00

MAGNOLIA 'WADA'S MEMORY' - Sent by K. Wada from Japan to the University of Washington. This fast upright grower will grow 2-3' per year. Hardy to -20° F. and also capable of withstanding the heat of Southern California. The 4-6" white flowers appear by the thousands in March. The new leaves are purple and change to dark green in summer. One of the few magnolias with pretty yellow fall foliage.

1 gal. \$ 50.00

MAGNOLIA 'WOODSMAN' - Hybridized by Joe McDaniel using M. acuminata and M. liliflora. This magnolia is interesting (weird) in that it is purple, green and yellow all in the same flower. Not Roger's favorite, but Marj and many others think it's attractive.

2 gal. \$ 70.00

MAGNOLIA 'YELLOW FEVER' - Don't like the name, but it's a pretty soft yellow in late March-April. Will get 30-40 feet tall in time.

2 gal. \$ 70.00

From Mahonia on

MAHONIA

M. 'CHARITY' - One of the M. media hybrids (japonica x lomarifolia). One of our finest winter; actually year round shrubs. The evergreen foliage gets up to 18" long and 12" wide. Our big plants of the media hybrids are 12' tall and make an architectural form. The flowers begin to show color (bright yellow) in late November and continue until February. The fruit turns bluish-purple in the late spring. When the birds discover the fruit they immediately devour them.

1 gal. \$ 35.00

M. GRACILIPES - Has broad foliage similar to M. bealii but it has beautiful bluish color under the leaves. We thought it was very tender but M. gracilipes has been down to 5° F. a couple of times. The flowers are copper colored in September-October. Grow this plant for its pretty foliage, not its interesting flowers

2 gal. \$ 35.00

METASEQUOIA

 **M. G. 'HAMLET'S BROOM'** - is a little dense shrubby dawn redwood. The light green leaves will turn pretty yellow before falling.

1 gal. \$ 48.00

 **M. 'NORTH LIGHT'** - is a small bushy light green dawn redwood. The tips of the branches are white. The 6' plant is very pretty all summer. In fall, the foliage turns golden yellow.

1 gal. \$ 46.00

MUKDENIA

M. 'ROSSI' - The more we grow this 1' perennial the more we enjoy it. A woodland perennial with small white flowers in June. The dark green leaves turn bright red in the summer-fall

1 gal. \$ 12.00

MUKGENIA

M. NOVA 'FLAME' - A Bergenia hybrid with Mukdenia. The flowers look somewhat like Bergenia and are bright pink in spring. All summer, the foliage is deep green and looks like a Mukdenia. In fall, the evergreen foliage will turn red purple.

1 gal. \$ 15.00

NANDINA

 **N. 'BONFIRE'** - Will get to 3' tall. The new foliage is rich purple and turns mid green as it ages. In the containers the purple growth has held through the summer. Much more garden adapted at 3' not like the species at 8' plus.

1 gal. \$ 20.00

N. DOMESTICA 'FILIMENTOSA' - Nandinas are used all over the west and south as an easy utilitarian plant. The difference here is the size and texture. N. d. 'Filimentosa' will get to 18". The evergreen leaves are thread like and thin.

1 gal. \$ 22.00

NYSSA

 **N. 'TUPELO TOWER'** - is a much more upright tree 30'x20' wide. The rich green leaves will turn glowing red in fall. Great for smaller spaces.

2 gal. \$ 52.00

N. 'ZYDECO TWIST' - This tupilo has contorted irregular stems. The adaptable tree comes from the SE U.S. The contorted stems add an extra bonus with its superb orange, red and yellow fall color.

1 gal. \$ 50.00

OMPHALOIDES

O. 'CHERRY INGRAM' - Named for English gardener Collingwood Ingram (of flowering cherry fame). This low growing perennial gets up to 1' tall in bloom with small brilliant blue flowers. In early March-April O. 'Cherry Ingram' is a perfect companion for *Corylopsis pauciflora*. The plants will slowly grow into mats of flowers and foliage.

1 gal. \$ 10.00

OPHIPOGON

 **O. JAPONICA 'NANA'** - is the dwarf lilyturf. This 2" cutie has evergreen narrow grass like leaves. Nice among stepping stones or between rocks.

1 gal. \$ 15.00

O. NIGRESCENS - Black Mondo Grass. The black color is actually a sunburn of maximum proportions. It will be green, if put in full shade. *Ophiopogon nigrescens* is a low growing grassy looking plant. It is great with cyclamen or snowdrops for a great contrast.

1 gal. \$ 12.00

OSMANTHUS

O. FORTUNEI 'SAN JOSE' - We never seem to have enough of this evergreen shrub. O. 'San Jose' gets to 15' and is an upright grower. Has been hardy to -12° F. here. The evergreen leaves are holly-like, but don't have sharp points like the holly. The tiny whitish flowers in fall have a wonderful apricot fragrance. O. 'San Jose' will make a superb hedge.

1 gal. \$ 20.00

O. FRAGRANS - Has creamy yellow orange flowers in November. The flowers are small, but incredibly fragrant in November. The smell of apricots is intoxicating. The plant is evergreen and can get 12-15' tall.

1 gal. \$ 40.00

O. H. 'GOSHIKI' - This evergreen shrub grows 4'-5' tall and wide in time. The foliage is holly like and is marbled with yellow on a dark green background.

1 gal. \$ 20.00

O. H. 'JIM PORTER' - Will get 12-14' tall with broad deeply toothed spiny foliage. The deep green leaves are very attractive. In November, the small flowers will smell of apricots.

1 gal. \$ 25.00

O. H. 'PURPUREUS' - This will make a 6' x 6' shrub with deep green foliage year round. In spring and early summer (through July) the new foliage is deep purple.

1 gal. \$ 22.00

O. H. 'OGON' - Has golden holly-like leaves throughout the year. Our plant sulked until the magnolia overhead grew. Seems to do best in shade as the color will be best and the plant will thrive.

1 gal. \$ 22.00

O. H. 'ROTUNDIFOLIUS' - This 4' mounding evergreen is a tough irregular shrub. The foliage is rounded and perhaps 1" long. The foliage is deep green. Don't know when or what the flowers are like as we haven't seen any and can't find any information.

1 gal. \$ 22.00

O. H. 'SASABA' - O. 'Sasaba' is an outstanding plant. The sharply pointed evergreen leaves look somewhat like a small bamboo. We have seen 5-6' upright shrubs of O. 'Sasaba' at Brookside Gardens, MD and were very impressed. The plants we are offering are 3 year olds and seem to take off and grow faster after this age.

1 gal. \$ 25.00

2 gal. \$ 30.00

OXYDENDRUM ARBOREUM-

Sourwood comes from the Appalachians. Our original tree planted in '81 is 30'x 8' and has beautiful pendulous flowers similar to *Pieris Japonica*. In October the foliage is bright red, the plant is on fire. We also have 6' plants at the nursery only.

1 gal. \$ 25.00

PAEONEA

P. 'DELAVAYI' - This plant looks very much like *P. ludlowii* var. 'Lutea' but, rather than the brilliant yellow flowers, *P. delavayi* will have deep maroon flowers. The 6-8' shrub will have multiple trunks and spectacular green foliage all summer. In the fall the leaves will turn bright yellow. The plant is very hardy as well as being a beautiful shrub.

1 gal. \$ 20.00

P. 'GAUGIN' - The best tree peony! *P. 'Gaugin'* will get 4' tall and has many peachy orange purple flowers 6" across in April. The combination of colors is stunning every year.

Limited 5 gal. \$ 110.00

P. LUDLOWII 'LUTEA' - This tree peony has single golden yellow flowers. The plant can get to 8' tall in 20 years. The foliage is typical tree peony form but is longer and narrow. These plants are seedlings so may take 2-3 years to bloom but will have uniform gold, yellow flowers.

2 gal. \$ 25.00

PHILADELPHUS

P. 'BELLE ETOILE' - Lemoine hybrid from the 20's or 30's. The 2" white flowers have a beautiful lavender-purple blush to the center of the flowers. Wonderful fragrance on this 10-12' shrub.

2 gal. \$ 28.00

P. CORONARIUS 'VARIEGATUS' - The variegated foliage is soft green with a cream border. The plant will only get to 4-5' tall. This small mock orange will have sparse, but wonderfully fragrant white flowers.

1 gal. \$ 28.00

P. 'SILBERGREN' - Is a 6' single white mock orange. The foliage and flowers are small, but very beautiful. The flowers are 1" across and are snow white with a wonderful fragrance. Thank you to Glenn Withy and Charles Price for our original cuttings.

2 gal. \$ 30.00

PHORMIUM

P. 'ALLISON BLACKMAN' - Has yellow and green leaves that are spear shaped. Along with the major colors, there is chocolate brown giving the plant a distinctive look.

1 gal. \$ 20.00

 **P. 'BLACK RAGE'** - Has narrow very dark purple leaves. this upright grower makes a real impact.

1 gal. \$ 20.00

 **P. COOKAINUM** - Has deep green leaves on an upright evergreen plant.

1 gal. \$ 20.00

 **P. COOKIANUM 'PURPEUM'** - This deep purple phormium has broader foliage and is supposed to be hardier than many of the phormiums.

1 gal. \$ 20.00

P. 'FLAMINGO' Soft pink purple evergreen leaves makes a great container plant or garden plant.

1 gal. \$ 20.00

 **P. 'MAORI MAIDEN'** - Is a fine textured pink purple New Zealand flax. Very handsome in containers with annuals.

1 gal. \$ 20.00

P. 'MARGARET JONES'- Has narrow foliage with vibrant peachy pink leaves with green accents.

1 gal. \$ 20.00

 **P. 'PINK STRIPE'**- Has a gray green center to the blades with a nice pink margin. Will get 5-6' tall.

1 gal. \$ 20.00

P. 'PLATT'S BLACK'- Has deep black purple narrow foliage. This upright grower will be a striking accent with golden foliage plants.

1 gal. \$ 20.00

 **P. 'RAINBOW MAIDEN'**- Has a narrow leaf with pink purple vertical carriage of the plant, smaller (2-3').

1 gal. \$ 20.00

P. 'ROSIE CHAMELEON'- It is a similar size to 'Flamingo' but has brighter, orange pink color.

1 gal. \$ 20.00

P. 'WAITERA GOLD'- Is a variegated New Zealand flax with broad yellow margins and deep green centers to the plant. Seems to be fairly short.

1 gal. \$ 20.00

 **P. 'WINGS OF GOLD'**- Has gold and green leaves on a very upright grower. Will get 2-3' tall.

1 gal. \$ 20.00

PICEA

 **P. ABIES 'GOLD DRIFT'**- This strongly weeping spruce will need a stake to keep an upright form. The plant named by Robert Fincham has golden needles and will need afternoon shade so it doesn't burn.

1 gal. \$ 52.00

P. ABIES 'PUSCH' - This fun small plant has the cutest pink-purple cones even on young plants. The little cones will turn tan through the rest of the season. This arching plant makes a nice container plant for the garden.

1 gal. \$ 50.00

3 gal. \$ 85.00

 **P. GLAUCA 'PIXIE DUST'**- is an extremely small dense growing Alberta spruce. This plant comes from Iseli Nursery, Boring Or. Will only get to 18" in many years.

2 gal. \$ 75.00

 **P. OMORIKA PENDULA 'BRUNS'**- Eventually a 20'x2' strongly weeping blue green spruce. Makes a striking tall evergreen conifer.

1 gal. \$ 45.00

 **P. ORIENTALIS 'BERGMAN'S GEM'**- Eventually 10'-12' tall. This mid green spruce will have a layered form. A really pretty specimen plant.

1 gal. \$ 48.00

 **P. ORIENTALIS 'VAN SPEYBROCK'**- This 10'x3' spruce will form a narrow upright light green conifer. Found by Van Speybrock Nursery, OR.

1 gal. \$ 42.00

P. ORIENTALIS 'SKYLANDS' - This golden needled spruce creates a moderate sized evergreen tree. We have seen 15-20' trees. The needles are short and cover the branches.

Best color in winter. 1 gal. \$ 47.00

 **P. PUNGENS 'EARLY CONES'**- I just saw this plant in August at Talon Buchholz's nursery and was amazed. The blue needles appear on a horizontal branch structure. The cones cover the plant even on small specimens. Only 5 plants available!

3 gal. \$ 100.00

 **P. PUNGENS 'PALI'**- 18"x18". This Colorado blue spruce is a tight ball shaped form. The needles are tightly packed making a pretty specimen for the rock garden.

1 gal. \$ 52.00

PIERIS

P. 'KATSURA' - We have seen this plant for years with long white flowers in February-April. The reason we finally started growing P.'Katsura' is for the deep glossy purple new growth. The purple growth continues to appear through out the summer.

1 gal. \$ 20.00

P. 'LITTLE HEATH' - This wonderful smallish shrub has small green foliage with a cream margin. We say smallish because we originally read it could get 2' tall. Our plant is more like 8'. Are we too kind to the plant? Our plant blooms only sporadically each spring! Makes an attractive sort of bonsai effect as it ages.

1 gal. \$ 20.00

PINUS

P. CONTORTA 'CHIEF JOSEPH'-This beautiful pine has been one of our standard plants in the catalog for years. It is from eastern Oregon. This plant will green all summer. In late fall, when we get cooler (frosts) weather, it turn glorious gold. In winter, it positively glows. Can't send to California or Hawaii. In containers, protect from afternoon sun, as it will burn.

1 gal. \$ 85.00

6 gal. \$ 220.00

 **P. MUGO 'AMBER GOLD'**- A dwarf form with golden winter foliage. Will stay under 2' tall in many years.

1 gal. \$ 35.00

 **P. MUGO 'CARSTEN'**- A broad growing mugo pine with golden foliage in winter. P. mugo 'Carsten' will be wider than tall. Bright color in winter. Will really show up in the garden.

1 gal. \$ 35.00

 **P. MUGO 'JACOBSEN'**- is a really small slow growing irregular mugo pine. Will get 18x18" in many years with deep green needles.

1 gal. \$ 42.00

 **P. MUGO 'ZUNDERT'**- Comes from S. Van Wijnatten from the Netherlands. This 3x3' mugo pine has light golden yellow foliage all winter. In spring it turns deep green.

1 gal. \$ 35.00

PODOCARPUS MACROPHYLLUS-

This conifer is one of the few that can be grown in lots of shade all the way to full sun. This upright plant has broad deep green needles. Great in large containers.

1 gal. \$ 22.00

PODOPHYLLUM

P. PLEIANTHUM- An over the top foliage plant. This perennial has 6-12" rounded glossy deep green leaves all summer. In late spring the deep purple flowers appear under the huge foliage. By late summer the apricot shaped and colored fruit appear.

1 gal. \$ 22.00

POLYGONATUM

POLYGONATUM DIFF. 'VARIEGATA'- Marietta O'Byrne brought us a large clump of this handsome woodland perennial. The broad leaves have cream variegation. The plants are 18"-24" tall.

1 gal. \$ 15.00

PULMONARIA

P. 'BENEDICTION'- Named for Lori Benedict, a Seattle area gardener. Never got to see her garden. But, this great plant was named for her. The deep blue flowers are the best we have ever grown. 1 gal. \$ 15.00

P. 'MAJESTE'- Has glorious large silver leaves spring-fall. This easy woodlander has blue-pink flower in early spring. 1 gal. \$ 15.00

PONCIRUS

P. 'FLYING DRAGON'- Contorted hardy citrus. This interesting (weird) shrub or small tree always draws comments. The deep green stems have 2" sharp, curved thorns. In spring, the white flowers smell like citrus. In summer, there will be small citrus fruit. A great container plant. 2 gal. \$ 30.00

QUERCUS

Q. DENTATA 'C.F. MILLER'- Named for Carl Ferris Miller that gardened in South Korea. This Manchurian Korean native is a super oak. When we think of an oak leaf, C.F. Miller is the standard. Our 30' tree is really beautiful with its deep green leaves followed by coppery yellow fall color. Very hardy and attractive. 1 gal. \$ 60.00

Q. MACROLEPIS 'HEMELRIJK SILVER'- This oak came from Rhodes and was found by Robert & Jelena DeBelder. Don't know the eventual size, but assume it's not huge (seems to grow 6-12" per season). We gave our original plants to friends and they grew it much better than we did. The foliage is jagged and has silver hairs spring-summer. The caps that hold the acorns are somewhat like green chrysanthums. A very beautiful and fun plant. Can't be sent to California. 1 gal. \$ 48.00

NOTE: We are looking for scionwood of Quercus cerris 'Variegata'. We have under stock. If you get scionwood, we will share! We are still looking six years later! I am an optimist!

RHAMNUS

R. FRANGULA ASPLENIFOLIA- This buckthorn is attractive year round. During winter, the stems are dark gray-black with small white spots on a 12-14' shrub. The leaves are very narrow dark green and have a crumpled look. In fall, the foliage turns bright yellow. Can grow in very cold climates. 2 gal. \$ 20.00

RHODODENDRON For more complete descriptions see Greer's, [Guidebook to Available Rhododendrons](#).

R. 'AUGUSTINII'- This species will get 8'-10' tall and is fairly narrow. The purple flowers are 2" across and cover the plant in spring. 1 gal. \$ 25.00

 **R. 'CAESUM'**- is a small growing rhododendron from China. The lush green foliage is said to be some what deciduous, but our plant has held the foliage. The small flowers are yellow in March-April. Worth growing for the foliage. 1 gal. \$ 24.00

R. 'CARMEN' X YAKUSHIMANUM - This small shrub has shiny deep green leaves. The indumentum is like R. yakushmanum, but the flowers are red bells. 1 gal. \$ 22.00

R. 'COASTAL SPICE' - One of Jim Gerdeman's hybrids from Yachats, OR. This maddenii hybrid is white with a yellow and pink markings. The nutmeg scent is wonderful. 1 gal. \$ 28.00

R. 'CORNELL PINK'- is a pretty deciduous rhododendron blooming in late February. Very hardy and upright growing shrub with rich pink flowers. 1 gal. \$ 24.00

R. 'CRANE'- is one of the Cox hybrid rhododendrons from Scotland. Beautiful deep green leaves in a small 3-4' shrub in many years. Said to be very hardy with lots of white flowers in early spring. 1 gal. \$ 24.00

R. 'CRIMSON PIPPIN'- Is a small grower with vibrant red flowers. Presumed to be a hybrid with yakushmanum as it has nice indumentum. 1 gal. \$ 22.00

R. 'ELEPHANT EAR' - Named by Thompson's Nursery, Waldport, OR. This hybrid has pink flowers. But, the main reason for growing are the large, deep green oval leaves. This foliage makes an attractive rounded shrub. 1 gal. \$ 28.00

R. 'ELSIE FRYE' - One of our oldest maddenii hybrids. We have had R.'Elsie Frye' since the mid 60's. We grow our old plants in large containers in the shade house (plastic cover in winter and some heat to keep to 15-18° F, The large white and pink flowers scented of nutmeg. Superb. 1 gal. \$ 24.00

2 gal. \$ 30.00

R. FORRESTII 'REPENS'- Very limited number of plants available. This 2-3" shrublet will get 10-12" wide in many years. The deep green leaves are a perfect fit for the amazingly large waxy bells. 2 gal. \$ 45.00

R. 'FRAGRANTISSIMUM' - This hybrid with large white flowers in April. The truss will have only 3 or 4 flowers, but they are large and have a superb nutmeg scent. R. 'Fragrantissimum' isn't hardy here, but will do very well in a container to move inside during cold weather. 1 gal. \$ 22.00

R. 'HONEY BUTTER'- A Jim Barlup hybrid of R. Nancy Evans x Lems Cameo. This 4-6' plant will have beautiful pink trusses fading to yellow in the center of the flower. 2 gal. \$ 35.00

R. 'IODES'- Has orangish indumentum on a smallish plant. Our plant is 20+ years old and is perhaps 2' tall. Flowers are white with a pinkish blush. 1 gal. \$ 26.00

R. IMPEDITUM- This cute dwarf rhododendron species has tiny gray green leaves that are so fragrant. The tiny (1") purple flowers literally cover the 18x18" shrublet. 1 gal. \$ 20.00

R. 'KAZAN'- This evergreen Azalea has small deep green leaves on a bushy little shrub (12"x18") the tight growing plant will color itself with peachy orange flowers. 1 gal. \$ 20.00

R. 'KING BEE' - Has rusty colored indumentum and tomentum. This pretty foliage shrub will get 18"x18" in time. Flowers are small, but the foliage is so amazing. The flowers are not missed. 1 gal. \$ 24.00

 **R. 'LARAMIE'**- Lovely deep green leaves, which in spring-summer have light tan indumentum on top of the leaves. Year round the undersides of the broad leaves are wonderful with the light indumentum. The flowers are light pink to white in April-May. 1 gal. \$ 26.00

 **R. 'LUTESCENS'**- This is an upright growing species from China. The leaves are narrow and dark green with purplish cast. The bright yellow flowers appear in March. 1 gal. \$ 24.00

R. MACROSEPALUM 'LINEARIFOLIUM' - When people see this fabulous foliage plant they never guess it's a rhododendron. This is possibly the most unusual rhododendron. The leaves are 1/4" wide x 3" long. In late spring the lavender flowers have the same form as the foliage. 1 gal. \$ 24.00

R. MAKINOI X PACHYSANTHUM- We have grown this hybrid for several years. The broad leaves have light colored indumentum. The leaves are long and broad, somewhere between both parents. No flowers yet. But, who cares when the foliage is this great. 1 gal. \$ 26.00

R. 'MILKY WAY'- Was *Ledum groenlandicum* The botanist have decided it is a rhododendron. This dwarf evergreen has small white trusses in spring. The narrow leaves have a slight indumentum as they emerge. 1 gal. \$ 24.00

 **R. ORBICULARE 'EDINBURGH'**- These are spectacular large plants of this superb rhododendron. The leaves are like lily pads (they are round to oval). The pink trusses are outward facing bells in April. Only a few available. 6 gal. \$ 80.00

R. 'NEON'(Percy Wisemen x September Song)- This beautiful orange yellow rhododendron will get 4'x4' in time. 2 gal. \$ 35.00

R. 'PINK SNOWFLAKES'- This *R. racemosum* hybrid is small growing (to 18"x12"). The soft pink flowers cover the plant in March-early April. The new growth is burnished purple. 1 gal. \$ 20.00

 **R. 'PINTAIL'**- This Cox hybrid has bright warm pink flowers on a 2' evergreen shrub in March. 1 gal. \$ 22.00

R. PJM 'ELITE STAR'- PP 27,780-This extraordinary hardy evergreen rhododendron is a great landscape plant. This plant will grow in south facing sun. The foliage is deep green and will turn purple in the fall. The small lavender pink trusses cover the plant. 1 gal. \$ 20.00

 **R. 'POWDER SNOW'**- is a slow growing broad shrub with white indumentum. Most of the summer the indumentum will remain on the top of the leaves. Very light pink-white flowers. 1 gal. \$25.00

R. PSEUDOCHYSANTHUM 'EXBURY' - One of the most beautiful foliage plants we grow! Our oldest plant is about 25 year old and is 4' x 2'. The flowers are apple blossom pink. After the flowers, the new foliage has beautiful silver tomentum through the summer. The deep green leaves are pointed and are amazing year round.. 1 gal. \$ 24.00

R. 'QUAVER' - This shrub has rounded leaves with hairs over the top of the leaves. This maddenii hybrid has golden yellow flowers in March. 1 gal. \$ 25.00

R. RACEMOSUM 'WRIGHT' - is an upright plant (4-5' in time). The stems are deep purple year round. The foliage is dark green. In late March the small rich pink flowers cover the plants head to toe. If the plant thins out, just cut down to 6" after flowering and the plant will renew itself. 1 gal. \$ 22.00

 **R. SARGENTIANUM'**- is a very small (12") rhododendron species from China. The small leaves and plant are a great backdrop to the cream to light yellow flowers. Rarely available, Used to be more available. 1 gal. \$ 22.00

R. SCHLIPPENBACHII 'SID'S ROYAL PINK'- The royal azalea is a 6' shrub. This deciduous plant has very pretty light pink flowers in early spring. Hardy. Even in New England. 1 gal. \$ 22.00

R. 'SINOGRANDE'- Wowzer! Huge 18"x12" leaves. One of the giants of the rhododendron world. The flowers are yellow bells. We know a local plant that has been through 0°F. But, we don't recommend it. 1 gal. \$ 28.00

R. 'VASEYI' - s a southeastern U.S. native. This deciduous azalea blooms in early March with light pink fairly small flowers. This plant makes an elegant shrub for the garden. 1 gal. \$ 25.00

 **R. 'WINE AND ROSES'**- Has glorious wine purple indumentum under the leaves. The 2'x2' plants are really beautiful after many years. Flowers are red in loose trusses. 1 gal. \$ 26.00

R. WILLIAMSIANUM - Our plants are 20 years old and are 18"x 48" wide. The plants are so beautiful with their oval leaves. The new growth is bronze-purple changing to deep green. The large bell- shaped flowers are light pink in April. 1 gal. \$ 22.00

R. YAKUSHIMANUM 'KEN JANECK'- Is a large grower in time (30 years) to 8'. The glorious flat leaves are covered with soft indumentum. Hardy to the Great Lakes area all the way to Los Angeles. The flowers are showy trusses of apple blossom pink. 1 gal. \$ 22.00

R. 'YAK PAC' - We like the plant not the name. Our plant is 2' x 3' and gets the best from both parents. The foliage is truly outstanding year round. Plants don't get much better than R. 'Yac Pac'. 1 gal. \$ 24.00

 **R. 'YELLOW DANE'**- is one of the Cox hybrids from Scotland. This 12-18' shrublet has deep green leaves. The flowers are small bright yellow trusses in April. 1 gal. \$ 22.00

RIBES

R. LAURIFOLIUM - An evergreen flowering currant with chartreuse green flowers in spring. This is one of the plants we usually have at the nursery, but we don't propagate enough for the catalog. This is an interesting 18" x 48" shrub for the semi-shade. 1 gal. \$ 22.00

R. X GORDONIANUM- This hybrid of *R. sanguineum* x *R. ordoratum* was done in 1837. (Learn something new, didn't know it was named that long ago). The plant will get 6' -8' and have reddish peachy flowers in March. Not available too often, but nice. 1 gal. \$ 22.00

ROBINIA PSEUDOACACIA 'FRISIA' -

The golden leaved black locust has brilliant yellow foliage all summer with no green at the center of the tree. This year we have 1'-2' plants which will be great to ship. R. 'Frisia' grows 4-6 feet per year. 1 gal. \$ 30.00

RODGERSIA

R. 'BRONZE FORM' - Has dark purple new growth in spring turning green in summer. R. 'Bronze Form' will eventually get 3-4' across and 1 1/2' tall.

1 gal. \$ 14.00

R. 'ROTLAUB' - A fairly large leaved perennial. In spring, the leaves have purple tints. Late spring, the 2" white flowers make a nice show. In fall, R. 'Rotlaub' turns lovely yellow.

1 gal. \$ 14.00

ROMNEYA COULTERI - Fried egg plant.

This California native is perfectly hardy here. R. coulteri is a very adaptable sub shrub (will freeze to ground most years). This suckering shrub will grow in very dry soil or well-drained watered garden. The flowers are white crepe paper with yellow centers in May-June. 1 gal. \$ 20.00

ROSA

ROSA 'ALATISSIMO' - This single rich red rose is an upright grower. Our plant is tied to a trellis and blooms from May-September. 1 gal. \$ 22.00

ROSA SERICEA 'PTERACANTHA' - The wing thorn rose has glorious red thorns that the sun will shine through. We let our plants grow a year then cut down to 1'. That way we get the biggest red thorns each year. White flowers are small (1") but don't appear when cut back each year.

1 gal. \$ 18.00

RUBUS CALYCINOIDES - This low

growing evergreen ground cover is a great plant for sun or shade. The netted foliage is deep green year round. The yellow blackberries are sweet in summer. Doesn't seed or run but slowly spreads. 1 gal. \$ 12.00

SALIX

S. BOYDII - One of the smallest shrublets we grow. Our 8 year old plant 6"x3". This cute plant has 1/4" oval foliage that is deep green with deep veins. We only recommend in a container or small rock garden. These plants are only 8" tall. Extraordinary. 2 gal. \$ 55.00

S. ALBA 'BRINTZENSIS' - This willow has brilliant glowing red orange stems in winter. If left alone, this plant will get 30'. We cut our plant down to 4' every winter. The fast growing stems make a warm winter show.

1 gal. \$ 20.00

S. ELEAGNOS VAR. 'ROSMARINIFOLIA' - This willow has the narrowest leaves imaginable. The deep green leaves will be 1/4"x4". This plant will make a small tree in time. We however prune our plant hard every spring so it will get 6-8'. 1 gal. \$ 18.00

 **S. FARGESII** - is a 6-8' shrubby willow with deep mahogany new growth during winter. The leaves are 6-8"x2" are deep green and heavily veined. Only a few available.

1 gal. \$ 24.00

S. 'SWIZZLE STICK' - is a contorted willow that has red stems in winter. This fast grower can be stooled to keep the plant smaller. Very exciting and hardy in the garden. Nice in cut flower arrangements. 1 gal. \$ 20.00

S. YEZOALPINA - A great ground cover that has large (2" x 2") round leaves that are deep green with prominent veins. Yellow fall color then an interesting branch structure during winter. Can grow in full sun to semi-shade. Very adaptable plant for many positions.

1 gal. \$ 16.00

SAMBUCUS

 **S. 'BLACK LACE'** - is a blackish purple cut leaved elderberry. The pink flowers in June are really nice combined with the deep purple foliage. 1 gal. \$ 20.00

SARCOCOCCA

S. 'DIGNYA' - This shrub has long deep green leaves on a 2' plant. The stems are purple year round. The plant grows great in shade and blooms in January-February with sweetly scented white flowers. 1 gal. \$ 20.00

S. 'FRAGRANT VALLEY' - This sweet box has much smaller foliage and structure than S. hookinana 'Humilis'. The flowers are small white puffs in winter that have an excellent fragrance. 1 gal. \$ 18.00

S. ORIENTALIS - Is a 2'-3' suckering shrub. The glossy evergreen leaves are attractive all year in January-March. The small white flowers have a wonderful fragrance.

1 gal. \$ 20.00

SASSAFRAS

S. ALBIDIUM - is one of America's most beautiful foliage trees. We know this can be a thicket former, but here in the Northwest it's a beautiful tree. Can be planted in dry area and watered for the first couple of years, then allowed to exist without additional water. 2 gal. \$ 28.00

SCHIZOSTYLIS

 **S. 'OREGON SUNSET'** - is one of our discoveries. Back in the 1980's in the middle of our patch of S. Mrs. Haggarty a red flowered plant appeared. We named it S. 'Oregon Sunset'. The plant is vigorous to 18" and has vibrant red flowers In August-October. 1 gal. \$ 10.00

S. 'SNOW MAIDEN' - The white flowers appear in August and continue through fall.

1 gal. \$ 10.00

S. 'SUNRISE' - Has bright pink flowers on 18" stems late August - November. 1 gal. \$ 10.00

SCIADOPITYS

S. VERTICILLIATA - The umbrella pine. These seedlings or cuttings will make a nice evergreen tree. These are a good alternative for the more expensive cultivars.

1 gal. \$ 32.00

2 gal. \$ 45.00

 **S. VERTICILLIATA 'WINTER GREEN'** - Has deep green needles year round. S. verticillata can turn yellowish in winter, where as S. 'Wintergreen' will hold its color.

1 gal. \$ 50.00

SISYRINCHIUM

S. 'AUNT MAY'- Only a few available. This iris family is known as yellow or blue eyed grass. this form has fan shaped iris looking leaves that are attractively margined with cream. Creamy, yellow flowers. 1 gal. \$ 20.00

SEQUOIA

S. SEMP. 'KELLY'S PROSTRATE'- Our 15 year old plant is 1'x5'. The mid green needles are flat like a typical redwood. But, the plant is totally horizontal. We don't even need to prune upright sprouts. Makes a pretty plant over a wall or around large stones. 3 gal. \$ 55.00

SOLANUM

S. 'GLASNEVIN'- is a vining potato vine. The evergreen foliage is glossy year round. The small flowers are medium blue. Must be tied to a trellis as there are not tendrils or holdfasts. 1 gal. \$ 24.00

STACHYURUS

S. SALICIFOLIUS - We look at this plant strictly for its narrow (long leaves). Our plant in the garden has 6" long and 1/2" wide leaves on an irregular open plant. The flowers are four inch spikes of yellow in early spring. 1 gal. \$ 25.00

STEWARTIA

S. 'BALLET' - One of the Polly Hill selections from Martha's Vineyard, MA. Our 30' tree is fairly broad and has large white flowers in June-July. Fall color is brilliant red. Rarely offered and only a limited number available. 1 gal. \$ 60.00

S. HENRYAE 'SKY ROCKET' - is an upright stewartia with rich red-orange fall color. The flowers are produced in great numbers May – July. 1 gal. \$ 60.00

S. MALACODENDRON- Our southeastern native stewartia. The 2" white flowers appear in May-June. The flowers have deep purple stamens making beautiful individual flowers on a 10-12' open shrub. We haven't had S. malacodendron available for several years. Very rare! 1 gal. \$ 65.00

S. MONADELPHA - One of the most beautiful trees in our garden. S. monodelpha has incredible flaking, tan, orange bark. The dark green foliage turns brilliant orange, purple and red. Each plant of S. monodelpha has a different fall color. The flowers are small, white and camellia looking. 1 gal. \$ 45.00

S. PSEUDOCAMELLIA - This stewartia is probably the finest for general cultivation. The bark flakes off like a sycamore and has patches of creamy gray, brown, and orange. The flowers are white and have orange stamens. The green foliage turns flaming crimson and yellow in fall. This is a small 20'-40' tree of the greatest qualities. 1 gal. \$ 35.00

3 gal. \$ 75.00

Nursery only 10 gal. \$ 125.00

S. PSEUDOCAMELLIA 'PEWTER'- Guy Mitchum found this beautiful form of an already glorious tree. The deep green leaves have a silver sheen to them. These plants will create a real showstopper in the woodland garden. Flowers and bark are also lovely. 1 gal. \$ 70.00

S. PSEUDOCAMELLIA 'PILLAR BELLA'- is a columnar form. The original 15 year old plant is 12'x3'. This plant makes a nice addition to the small garden. It is a narrow plant with some height. Flowers are similar size to S. pseudo. 'Ballet' but, a much narrower tree; also from plantsman, Crispin Silva. 1 gal. \$ 75.00

S. ROSTRATA - The "beaked stewartia" - Our plant came from Brian Mulligan in the 80's and is 30' x 14'. The flowers are white in May – June followed by beautiful maroon seedpods. The fall color is dark red-purple. This plant is rare in China. 1 gal. \$ 70.00
2 gal. \$ 75.00

S. SINESIS- Our plant came from Duncan and Davis in the 80's. This plant is now a 15'-18' small tree. The bark shreds off all year. The small white flowers are produced by the hundreds in June-July. In fall, the small leaves turn such brilliant red. It truly glows! 1 gal. \$ 55.00

S. SINENSIS 'GARDENS GUARDIAN' - Comes to us from Crispin Silva. He discovered this seedling 10-12 years ago. The original plant is 6'x2' and a full bushy plant. The flowers are typical S. sinensis and fall color is brilliant red-orange. This new Stewartia can be grown in very small gardens. 1 gal. \$ 80.00

STYRAX

S. JAPONICA 'EVENING LIGHT' - (PPAF) - When I first saw this plant it was immediate lust. In full sun the foliage is so dark purple it's black. The flowers are stunning against the dark foliage. When grown in shade the foliage is more purplish. 1 gal. \$ 80.00

S. JAPONICA 'FRAGRANT FOUNTAIN' - P.P.A.F.- We have had Styrax japonica 'Carillon' for many years and it's a beautiful small tree. The only problem is our 30-year old plant is 12' X 12'. So it takes up a lot of room in a small garden, however beautiful it is. We found out about a new weeping styrax japonica several years ago discovered by an Oregon nurseryman who grows thousands of seedlings. Occasionally a new interesting plant pops up. This excellent plant will grow upright with a terminal leader; but all the stems are strongly weeping. We have seen trees that are less than 2' wide. The flowers are the typical white stars in May and June. We only have a small supply available. 2 gal. \$ 80.00

S. JAPONICA 'FROSTED EMERALD' - P.P.A.F - From the same nurseryman with an excellent eye for new plants (see above). Foliage is what it's all about! The foliage on this styrax is deep green with bright splashes of creamy white. We have seen plants of Styrax 'Frosted Emerald' in full sun that have lovely splashes of white on the leaf. In semi-shade the plant will be almost totally creamy white. We would recommend that it is grown with some afternoon shade. 1 gal. \$ 80.00

SYCOPSIS

S. SINENSIS 'NARROW LEAF'- The narrow foliage is ½ x 3" and is deep green. Will make a handsome shrub with striking foliage and small red flowers. 1 gal. \$ 25.00

SYMPHYTUM

S. 'AXMINSTER GOLD'- This variegated comfrey is a glorious foliage plant. Best to let grow in spring and then cut hard to the ground. The leaves will get much better and usually won't flower. The leaves are golden yellow margin with green centers. 1 gal. \$ 20.00

SYMPLOCARPUS

S. 'MAGICAL PRIDE'- is a snow berry with soft pink fruit completely covering the 4' shrub. This plant can be used in the dry, native type garden or the watered garden. 1 gal. \$ 17.00

TAXODIUM

 **T. 'PEVE MINARET'**- This plant will make a small upright tree in time. The needles occur in clump form. The light green leaves will turn lovely golden yellow before falling. 1 gal. \$ 48.00

 **T. 'GEE WIZZ'**- is a dense, slow growing bald cypress (5'-6'). This dwarf plant has an arching form that is broader than tall. Found by Gary Gee in Mississippi. 1 gal. \$ 45.00

TAXUS

T. 'BEAN POLE' - This yew is as narrow as a beanpole. The 8' plant will get to 1' wide. The deep green needles on the upright plant make quite a statement in the garden. 1 gal. \$ 28.00

 **T. CUSPIDATA 'REZEK'S GOLD'**- is an arching shrub with beautiful gold needles with a moderate size. A bright gold plant that can be a real focal point. 2 gal. \$ 60.00

T. 'WATNONG GOLD' - Vibrant gold foliage year round. This broad growing yew will make a bright evergreen shrub. 1 gal. \$ 26.00

TRACHELOSPERMUM

T. 'PINK SHOWERS'- The star jasmine has evergreen glossy foliage. This vine will cover itself with very soft pink, fragrant flowers. 1 gal. \$ 22.00

TROCHODENDRON ARAILOIDES-

Japanese wheel tree makes a beautiful small tree. This subtle plant has glossy deep green leaves. Hardier than we thought, as it grows well in New York. The small flowers are green clusters. 1 gal. \$ 32.00
Amazing Large plants 5 gal. \$120.00

TSUGA

T. DIVERSIFOLIA 'LOOWIT'- is a low growing hemlock. Seems to be wider than tall. These plants are 3-4 years old and are 4"x6". Very cute little hemlock. 1 gal. \$30.00

T. MERTENSIANA - Our mountain hemlock from high in the Cascade Mountains. We don't see this plant until about 6000' feet. The mountain hemlock will be one of the last windblown trees at the tree line. The irregular stems are covered with gray green needles. This plant is a slow grower and makes a superb specimen plant or grouping in our valley gardens. We have had a plant for 50 years and it's 30' X 8' and it makes a stunning focal point. 3 gal. \$ 50.00

VACCINIUM

 **V. 'CABERNET SPLASH'**- Comes from V. 'Toro'. It has deep purple growth when the foliage emerges. Through the summer, the leaves keep an attractive purple cast. Produces lots of medium size fruit in summer. 1 gal. \$ 20.00

V. 'SUNSHINE BLUE'- For years we have grown this superb plant for its blue foliage all spring-fall. In late fall (December) the orange, red and yellow fall color appears. During summer we get a month and half of sweet fruit. V. 'Sunshine Blue' is cold hardy as well as being able to fruit in Southern California. If you only have room for one blueberry, V 'Sunshine Blue' should be the one. Flowers are soft pink in small clusters. 1 gal. \$ 18.00

VIBURNUM

V. BODNANTENSE 'DAWN' - This plant originally from Wales has been in Northwest gardens for decades. V. 'Dawn' starts blooming in November and continues until March. The small clusters of pink flowers have a wonderful sweet musky scent all winter. 1 gal. \$ 25.00

V. OPULUS 'AUREUM' - This viburnum has golden leaves from April-October. The leaves are a nice golden color to back up the white lace cap flowers in June. 1 gal. \$ 20.00

V. OPULUS 'COMPACTUM'- We saw this lovely shrub for sale at the Farwest Nursery Show for several years before finally buying it. In late summer the 6' shrub covers itself with golden yellow clusters of fruit. As the fall comes (August) the fruit will be flushed with red. 1 gal. \$ 20.00

 **V. 'PINK BEAUTY'**- is a double file viburnum with nice pink flowers totally covering the top the stems. The plants will have a few vertical stems with the rest of the stems being horizontal so the flowers are beautifully presented. The flowers are followed by red fruit in August-October. 1 gal. \$ 25.00

V. 'PINK SENSATION'- We still think this is the best of the pink V. tomentosum varieties. We got our original cuttings from Connie Hansen, Lincoln City, OR. The lovely pink flowers are backed by deep purple new foliage. 1 gal. \$ 25.00

V. 'POPCORN'- is a tomentosum selection. Our old plant (30 years) is 10x10'. In spring, this plant has hundreds of popcorn white flowers. The flowers are 2-3" across and are snow white. 1 gal. \$ 18.00

V. PROPINQUUM - This glossy foliated evergreen make a beautiful mound 4-5' tall. The leaves are narrow and are very deep green. Flowers are white followed by black fruit in fall. 1 gal. \$ 20.00

V. 'SUMMER SNOWFLAKE'- Blooms non-stop from April until November. This University of British Columbia selection originally said to get 4'-6' (Ha!) Our plant is 12'-14'. The white flowers are lace cap form and will last for weeks. Very hardy! 1 gal. \$ 22.00

VITIS

V. VINIFERA 'PURPUREA'- The claret grape has pretty deep purple leaves all summer. In fall, the foliage will turn lovely red. The small 3" clusters of deep purple sour grapes are inedible, but attractive. 1 gal. \$ 25.00

WISTERIA

W. FRUTESCENS 'AMETHYST FALLS'- We have not planted any other wisteria, as they can be overwhelming. This small slow grower will bloom very young. The lavender flowers are only 6"-8" but have an attractive form. 1 gal. \$ 25.00

YUCCA

Y. 'GOLDEN SWORD'- This yucca has lots of gold on the foliage. So, from a distance, the plant looks golden. A very hardy perennial for full sun to semi shade. 1 gal. \$ 16.00

ZENOBIA

Z. P. 'BLUE SKY' - This zenobia has dusty blue foliage all summer and fall. The foliage will change color to golds, orange and red in December and January. The flowers are white bells in June. 1 gal. \$ 22.00

Z. P 'RASPBERRY' - Don't remember where we got this plant but it's a real find. The deep green glossy foliage is pretty all summer. In November-December the leaves turn shades of yellow, orange and red. In June the bell shaped flowers are a lovely light pink. 1 gal. \$ 22.00

There are many superb plant sales each year in Eugene, Salem and Portland beginning in April and ending in September. Call for details. Come see us at any of the sales.

We also have an expanded range of perennials mostly for the shade garden. The plants include epimediums, primulas, ferns, and other beautiful spring flowering plants.

GARDEN COACHING OPPORTUNITY

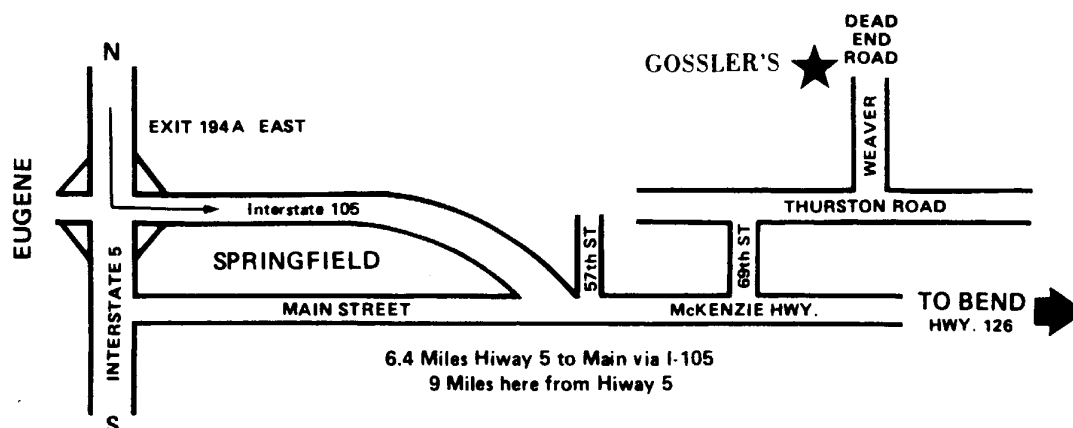

Roger has been offering coaching services to those who want assistance with their gardens. This service comes with a 10% discount on all plants purchased for the next month after the visit. Roger will offer design ideas and counseling along with suggestions on what plants will work best in your particular situation. He can also perform plant identification for those plants already in your landscape. Each visit will be followed by a written list of instructions and he will always be available for follow up here at the nursery.

The following is provided graciously by one of his current clients.

“Inviting Roger into our garden to be a ‘garden coach’ was one of our best horticultural investments. He has an almost endless amount of information regarding plant growth and habit. His depth and knowledge on what to plant where, why, when and how was a great help to us. And, perhaps most important, it was wonderful fun. A visit from Roger would leave us quite excited about new plant possibilities. In a few words and wild hand gestures, he could turn an ugly shady corner bed into a colorful hydrangea planting that would be beautiful and hide the shed wall and fence. We will continue to use the garden coach service and we know that each visit from Roger will be enjoyable and full of new information.”

Sincerely, Nancy Beck

If you are interested in Roger’s services please contact us and we have a brochure explaining all the details. Also feel free to call and talk to Roger anytime and he can set up a visit.

TERMS, PLANTS, PRICING AND SHIPPING:

We really care about our plants customers and pricing. So the following is to help explain some of the changes for this coming season.

Plants: Most are cuttings grown from our stock so we know the correct variety. We have grown them at least a year and list varieties in the catalog available at press time and try to indicate if only a few are available. The plants are evaluated as to hardiness, beautiful flowers, foliage, fruit, etc. The plants are taken out of the containers and tied into plastic bags, then secured into the boxes. We do not ship bare root plants.

Price: It is a difficult decision, so we try to be fair so not only the wealthy can afford them (we are collectors too). The availability, propagation, container growing, as well as nursery costs must come into play.

Since shipping costs have risen drastically over the last few years and the boxes for our plants are much larger than other nurseries and therefore much more expensive. We are adjusting our shipping charges after more than 30 years. The following table will be used to calculate our shipping rates. Our minimum has raised but on the larger orders it will work out to less than in the past in many cases.

Minimum shipping charge will now be: \$15.00

\$ 0	to	\$ 25.00	\$ 15.00
\$ 25.00	to	\$ 75.00	\$ 22.00
\$ 75.00	to	\$ 150.00	\$ 34.00
\$ 150.00	to	\$ 300.00	\$ 65.00
\$ 300.00	to	\$ 500.00	\$145.00

Plants are guaranteed true to name and are carefully selected quality plants. Our plants are regularly inspected by the Oregon Agriculture Department. Since we cannot control planting or growing conditions after shipment we cannot be responsible for loss.

We can supply a wholesale catalog upon request to nurseries and landscapers.
