The Mission of the North Carolina Christmas Tree Association is to promote "real" farm-grown Christmas Trees through marketing and education. We will contribute to the success of the Christmas Tree Industry by providing ethical, professional, and visionary leadership.

The Buy-Sell Directory is an annual publication of the North Carolina Christmas Tree Association and is designed to encourage contact between member-growers and tree buyers. All information listed in the directory was supplied to the association by firms or individuals on standard forms prepared by the Association.

Including this grower-supplied information does not constitute a warranty nor imply obligation on the part of the Association for either the accuracy of the information supplied or the reliability of those listed. The Association assumes no responsibility for accuracy or validity of claims in advertising.

Evaluating Tree Freshness on Retail Lot

To check how your trees are holding up on the retail lot, make the following observations:

Christmas trees are perishable. Their freshness can be lost rapidly during a severe drying event or slowly over time through neglect. As a retailer, you should periodically evaluate the freshness of your product. Your decisions on how to handle and market your trees should rely on the information you collect from your evaluation. If you find that your trees are losing their freshness on the lot, you might be able identify the conditions that are hurting your trees and better control them. If you are confident that your trees are holding up, you can help your customers to better appreciate their freshness.

There is a direct relationship between the amount of water in a tree and its freshness. Researchers use a couple of different methods to measure the amount of moisture in Christmas tree foliage, but they are time consuming. You can use several tree characteristics as a rough and ready indicator of tree freshness. These include tree color, needle retention, foliage temperature, branch and needle flexibility, and even tree weight.

How is the color of the tree? Dry trees tend to lose color and develop a paler green or washed out appearance compared to fresh trees.

Does the tree hold its needles when you brush branches or shake the tree? If more than a few current season needles drop, there could be a freshness problem with the tree. Losing some internal (older) needles is normal, but a tree should hold onto all of its younger needles on the outside of the tree. Needle loss is complex and can result from genetic variation, temperature extremes, high salt content in the tree aggravated by moisture loss, or a lack of dormancy of the tree resulting from unseasonably warm autumn weather.

Does the foliage of the tree feel cool to the touch? A fresh tree with good water content will feel cooler than room or ambient outdoor temperature. A dry tree will feel warm in comparison. Of course, foliage in direct sunlight will be warmer, so be sure to compare foliage under similar conditions. You might do this early or late in the day when conditions will be more uniform from tree to tree.

Are the needles and branches pliant and flexible? The needles on a fresh tree will bend with your touch and return to their normal position without breaking. The branches on a fresh tree will also easily bend and spring back to their resting position. Dry branches are stiff. Dry needles are brittle such that needle loss on dry trees is often from needle breakage.

How heavy is the tree compared to its neighbors? Weight can be misleading if you are comparing different size or density trees. However, if the trees are similar, a dry tree will weigh less than a fresh tree flush with water. If other tree characteristics are pointing to a dry condition, then lifting it up can confirm your evaluation.

Christmas Tree Association Contest*

Fresh NORTH CAROLINA FRASER FIR

The Perfect Christmas Tree

... The key to satisfied customers

Keep your trees shaded

Store trees in a shaded area. The North or east side of a building may work well too. Awnings, lathe houses, or shadecloth structures may be used if natural shade is unavailable. Do Not leave baled trees in full sun

Store Trees Upright

Trees stored standing up have less exposure to sunlight and lose less water

Keep your trees moist

Store trees upright on wet sawdust or mulch to help retain water. Mist stored trees periodically to reduce temperature and minimize moisture loss

Display Trees in Shade, and/or water

Trees displayed this way lose far less water and sell faster

Put a fresh cut on the stump for your customer

If possible. This will insure that the tree will take up water

Provide customers with tree care information

Visit us on the web at nchristmastrees.com

Specializing in Perfect Christmas Trees

What Sets Cool Springs Nursery Apart From The Rest?

Quality Trees. Quality Service. Excellent Customer Satisfaction.

Quality Trees

- We are a family business with a combined 50 years experience in growing Fraser Fir.
- Our trees are grown in the North Carolina Mountains, native home of Fraser Fir which means optimum growing conditions.
- Our growing methods are constantly updated and improved to reflect the latest research and technical support developed through North Carolina State University - The leader in Fraser Fir research.
- We maintain strict standards to assure a consistently high grade tree with generous height.

Quality Service

- We can ship small and large orders almost anywhere domestically and internationally.
- Our harvest procedures assure the freshest trees delivered to you, when you want them.
- Our goal is to make your business a success.

Excellent Customer Satisfaction

- **Azalea Garden Center - Fairfax, VA**
"Best trees I've seen in 20 years. You've got my business".
Mike - owner
- **Erkalano's Nursery - Annandale, NJ**
"We paid for a premium tree and got it! We appreciate your quality and service. You're a pleasure to work with".
Nancy - Manager

Points to Make with your Customers

Most customers want more than just the price of a tree from your sales staff. Many customers want to know about the tree — where it was grown, how old it is, or when it was cut. Others may want some reassurance about the freshness or quality of your trees. It can help sales to have answers ready for typical questions.

For a valuable product that is 10 to 15 years in the making from seed, you might even consider making a “story” about the trees you sell — where they are native to, a little about the farm or farmer that grew the trees, the year the seed was planted to be ready this year, even the amount of snow that typically falls where it came from. What you and your sales staff share with customers can give value and meaning to this important seasonal purchase. Make their experience with you memorable, and they will be back next year.

Life History of a Fraser Fir

- Fraser firs are native to the highest peaks of the Southern Appalachian Mountains.
- A typical seven foot Fraser fir Christmas tree started in a seedbed about twelve years ago. It grew eight or nine inches in three years. It then spent two years in a transplant bed where it doubled in size. Now it was transplanted to the field where it grew for the next seven years.
- Every year the grower fertilized it, pruned and shaped it, managed weeds and insects, and even protected it from deer.
- Each tree was the recipient of more than 100 cultural practices during its life.

Freshness and Durability of a Fraser Fir

- Fraser firs are adapted to a southern high-elevation climate that is quite changeable.
- Not only do they survive extreme winter cold and high winds, but must contend with greater temperature changes than trees grown in Northern States.
- As a result, Fraser fir holds up exceptionally well to the stresses of the harvest and retail season.
- Dormant Fraser firs will hold their needles for months.

Tree Care

- Consumers can do a lot to keep their trees fresh.
- Always keep the tree cool, dark, and watered until it is decorated.
- Store a tree in full shade where it can be kept cool.
- Put the trunk in a water bucket or pan if it is going to be more than a few hours before it is put up.
- If more than 2 days go by before it is put in a stand, a fresh cut of at least ½ inch should be made off the base of the tree.
- The tree should be displayed in a stand with at least a 1 gallon capacity.
- The water level should be checked daily and refilled as needed.
- Display the tree away from direct sunlight or any heat source.

The Environmental Choice

- North Carolina Fraser fir growers lead the industry in their efforts to take care of their land. Fraser firs are grown on steep mountainsides that are at high risk of erosion and require utmost care.
- NC growers have had to develop sustainable practices that are gentle to soil, water, and wildlife.
- Growers use Integrated Pest Management techniques to manage pests and maintain quality with minimum inputs.

THE ENVIRONMENTAL CHOICE

Real vs. Fake Christmas Trees

Real Christmas Trees

- ✓ Real Christmas trees are plantation grown on American family farms, making an important economic contribution to many rural communities in the United States.
- ✓ Real Christmas trees absorb carbon dioxide and other harmful “greenhouse” gasses and release fresh oxygen into the air. A Real Christmas tree has a fragrance beyond compare.
- ✓ One acre of Christmas trees provides the daily oxygen requirement for 18 people. There are about 500,000 acres of Christmas trees in the United States which collectively provide oxygen for 9 million people daily. Young, fast-growing trees like Christmas trees release more oxygen than mature forest trees.
- ✓ For every Real Christmas tree harvested, another one is planted in its place to ensure a steady supply year after year. Christmas tree fields support turkey, quail, songbirds, rabbits and deer.
- ✓ When planted outside after the Holidays, balled and burlapped Real Christmas Trees temper winds, suppress loud sounds, filter dust, moderate temperature, and dissipate odors.
- ✓ Real Christmas trees are an all-American renewable, recyclable resource. After the holidays, Real trees are chipped into biodegradable mulch, which replenishes soil in landscapes, parks, and schools. Most communities offer recycling programs.
- ✓ Recycled Real Christmas trees are also used as wind and water barriers at beaches and river beds to fight sand and soil erosion. They protect our water supplies, and provide refuge for wildlife. When sunk in ponds, they provide excellent refuge and feeding areas for fish.
- ✓ Real Christmas trees can be used as a feeding station and winter shelter for songbirds in your yard.
- ✓ Some consumers are allergic to dust that accumulates on surfaces of Real trees grown outside. You can wash most allergens off by spraying the tree with water before bringing it inside.
- ✓ The safest Christmas tree is a fresh, well-watered tree. A Real tree has never started a fire. Faulty Christmas lights, candles, and fireplaces can start tree fires.

Fake Christmas Trees

- ✗ Fake Christmas trees are made in Korea, Taiwan, or China. Importing artificial trees contributes to the US trade deficit.
- ✗ Fake Christmas trees are made from non-renewable plastics. The manufacture of petroleum-based plastics use up natural resources. Once used, they are gone forever.
- ✗ Furthermore, the manufacture of both plastic and metal components in the tree consume energy and create pollution.
- ✗ The average use of a Fake Christmas tree is only 6 or 7 years. Eventually, they all go to the landfill as garbage.
- ✗ Fake Christmas trees are not biodegradable. The plastics and metals that they contain, including lead, will remain in our landfills for centuries.
- ✗ Three Asian wood-boring beetle species have been imported to America on the wooden trunks of Fake trees. Undetected, these insects could attack native forest trees and lumber.
- ✗ Some consumers have suffered an allergic reaction to materials in their Fake tree.
- ✗ When a Fake Christmas tree catches fire, it releases dangerous toxic fumes into the home.

Why Should I Become a Member of the North Carolina Christmas Tree Association?

To promote the traditions and memories of celebrating Christmas with a Real Tree.

To protect and grow your business. NCCTA works to stop legislation and regulations that are negative to you and others growing, wholesaling and retailing Real Christmas Trees and to support beneficial legislation and regulations.

To be part of a community of Christmas Tree professionals and share the knowledge and experiences of thousands who share your concerns, questions and needs.

Special Benefits for NCCTA Members

- **PayAnywhere:** Credit card processing that helps support NCCTA with every swipe.
- **First Pioneer Insurance Agency:** Offers a special worker's compensation insurance program.
- **LifeStore Insurance:** Insurance discounts offered to members for property and liability coverage, workers compensation and health plan options.
- **First Benefits:** NCCTA members are eligible for workers' compensation coverage with no other membership requirements. (LifeStore Insurance and First Pioneer Insurance represent First Benefits Insurance at their respective agencies in the High Country).

Membership Benefits

- ✓ Listing with link to your own website on www.NCChristmastrees.com where over 92,000 visitors search for Christmas trees annually.
- ✓ Annual listing in the Buy-Sell Guide that promotes REAL trees to thousands of buyers
- ✓ Annual listing in the Choose and Cut Directory that promotes REAL trees to thousands of consumers
- ✓ You will receive an annual subscription (two issues) of Limbs & Needles Magazine; keeping you up-to-date on association news, technical information, Christmas tree research information, and industry updates and marketing & management tips.
- ✓ Updated tree inventory listing available on website after September 1
- ✓ Retail lot listing on website with Google location services
- ✓ Access to NCCTA's Online Member Center, with resources such as classifieds, wholesale buyer mailing list, choose & cut promotional mailing list, and digital archived copies of Limbs & Needles
- ✓ Attention to relevant legislative issues on State and National Level
- ✓ NCCTA funded research projects through NCSU & NCDA&CS are beneficial for success and growth.
- ✓ Local, regional, state, and national advertising
- ✓ Expanded promotional opportunities and organizational planning through Specialty Crop Block Grants obtained by the NCCTA
- ✓ Access to free retailer promotional materials provided through grant funding
- ✓ Representation at Industry Trade Shows and Consumer Shows where the Buy-Sell and Choose & Cut Memories publications are distributed.
- ✓ Use of the NCCTA logo and the NCCTA trademark design "North Carolina Fraser Fir, The Perfect Christmas Tree"
- ✓ Representation with educational and governmental organizations
- ✓ Access to experts in the field – speakers, other members, sponsors
- ✓ Provides great opportunities to meet and network with industry peers
- ✓ Reduced registration rates for annual Winter and Summer meetings where industry leaders share information and insights, and growers interact and share their individual experience.
- ✓ NCTA T.I.P. benefits
- ✓ You will be a part of North Carolina's voice for the Christmas tree industry. Whether that means presenting a Christmas tree to the Governor, meeting with legislators regarding concerns for our industry, or participating in promotional opportunities in the media, NCCTA members have visibility and a voice.
